

Special Mention

It is worthy of notice that this is not an ordinary catalogue, such as generally sent out, describing a few articles with doubtful accuracy; but a carefully arranged Manual, embracing only the choicest selections, the results of years of experience.

This edition includes principally Plants cultivated under glass, quite a few of which, however, are valuable also for outdoor decorations in Summer. We issue a separate and special Handbook entitled, "The Beautifying of Country Homes," which gives a full list of Hardy Ornamental Trees, Shrubs, Evergreens, Vines and Hardy Perennial Plants for permanent planting, a copy of which will be supplied upon application.

THE ROSE HILL NURSERIES

The Rose Hill Nurseries is the most complete horticultural establishment in the world. From these Nurseries, a new country place or a gentleman's estate can be furnished completely with every kind and variety of stock, in sizes and quality to give immediate effect. Every known plant or tree in cultivation can be furnished direct from our Nurseries.

GREENHOUSES AND CONSERVATORIES

Our stock of plants for the furnishing and filling of these is unexcelled. We can supply every known variety of plant of ornamental and decorative value, in Palms, Ferns, Orchids and Ornamental Foliage Plants enumerated in this catalogue, and many others which are not mentioned.

LANDSCAPE CONTRACTING DEPARTMENT

In this important branch, we have a staff of able, experienced men of thorough knowledge, taste and genius, whose schemes and plans are based upon the most practical and natural, as well as artistic lines.

PLANTING ORNAMENTAL STOCK FOR IMMEDIATE EFFECT

Our specimen stock of large and matured Shade Trees for avenues, Evergreens for solitary specimens or for groups, large flowering Shrubs for plantations and decorative plantings, also material for Old-fashioned Gardens, is especially cultivated and trained for such purposes. In fruit trees and small fruit we have a particularly fine, healthy stock of this very important line, for orchards and fruit gardens, in all the different forms of Standard, Half-Standard, Trained Pyramid and Espalier, in all the leading varieties; also Grape Vines for arbors and small fruit of all the choicest varieties, of mature age, which will give an early yield of fruit.

THE PRESERVATION OF TREES

The practical and efficient preservation of Fruit, as well as Ornamental Trees, is of the greatest importance. Trees do not grow in a day, month, or year. It takes the best part of a life-time to raise a tree to mature size and value and, therefore, we cannot afford to lose even one of them. Trees, like animals, require care and attention to preserve them and keep them in vigorous and healthy condition. Neglected trees, even if old, can, by proper renovating, pruning, scraping, cleaning and spraying, be made to live and do well for many years.

Our experience of over forty years in Pomology, Entomology and Forestry enables us to effectually and successfully carry on such work. With our practical method of treatment we have saved thousands of trees from untimely death and decay.

Our "Sure-Kill" Emulsion for the extermination of insects, especially the San Jose Scale, is a positive remedy. Examinations of orchards and ornamental trees are made by us upon application, and estimates for treatment submitted. No charge for consultation.

THE MOVING AND TRANSPLANTING OF BIG TREES

We are closely identified with the American Big Tree Moving Company and, therefore, are enabled to undertake successfully the furnishing, moving and transplanting of trees of any size from 6 to 36 inches caliper, and from 20 to 60 feet high.

RUSTIC WORK

We are the oldest and largest manufacturers of Rustic Work in this country. Our artistic workers in this line will readily demonstrate their skill where opportunity is afforded; sketches and designs can be submitted.

ROCK WORK

We are the sole agents for the very valuable petrified Tuffa Rock, which is of a highly artistic formation, thoroughly porous, which makes it very valuable for plant life.

Our artists in Rock Work construction and the building of Rock Gardens and Grottoes, are conceded to be the very best.

Conditions under which we Conduct our Business

1. All purchasers are requested when orderi g by mail or otherwise to give their proper address and directions where to and how they desire their orders shipped—whether by freight or express. When not advised how to ship we exercise our own judgment, and forward to the best advantage of the purchaser.

2. New customers and persons unknown to us are kindly requested to accompany their esteemed orders either with cash, post office orders or drafts on New York, or with satisfactory reference.

3. All orders are carefully packed for shipment by experienced hands, so they may be sent to even far distant points with perfect safety; and no charges are made for packing and shipping by express or freight at New Rochelle.

4. After delivery to forwarders in good condition, all shipments are at customer's risk; and complaints of any kind will not be entertained unless made promptly upon receipt of stock.

INTRODUCTORY

IN PRESENTING a new edition of our General Catalogue, we wish to call attention to the variety and extent of our stock as well as to its superior condition. Since the issue of the last edition, we have added to our collection very many new and valuable plants of recent discovery and introduction, as well as brought forward a number of beautiful species which, while years ago found among the finest collections, have, through neglect or perhaps extreme modern fashions, been partially lost sight of. Among these latter especially may o'ten be found the most charming forms, possessing all the attraction of the latest novelty, together with merits established by years of experience in their culture. We have for several years given especial attention to the re-introduction of many such deserving and valuable plants to their former place in the esteem of the horticultural public, and with gratifying success.

The 15th Street Store-Established 1867

The four illustrations shown on this page represent the progress of our New York stores from the founding of the business at 15th Street in 1867 to our magnificent new store, built in 1903, situated at 425 Fifth Avenue, Corner 38th Street.

Our 5th Avenue and 42nd Street Store in 1870

OUR ADVANTAGES

We are operating extensive tropical nurseries on our plantations in the West Indies, and are thus enabled to grow rapidly and to perfection, under most favorable circumstances, many things which are slow and difficult of culture in North America. Our direct connections with the most prominent botanical and commercial establishments of Europe, the East Indies, Australia and South America, are

Our Store at 5th Avenue and 37th Street in 1877

also a great advantage in enabling us to procure and exchange rare and valuable stock; wherefore it may be readily understood how we are in an exceptionally favorable way of meeting all demands for new, rare and valuable plants at the most reasonable prices.

A VISIT TO ROSE HILL NURSERIES SOLICITED

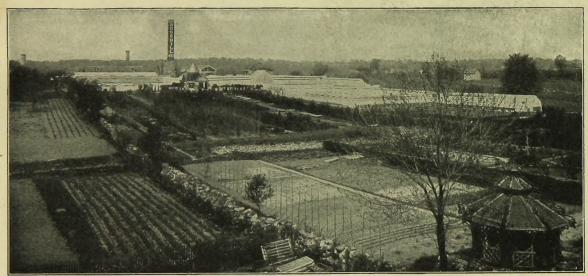

We invite personal inspection of the stock in our show houses at New Rochelle. Here are constantly many interesting sights, not common to ordinary nurseries—rare Orchids and tropical plants in bloom, grand specimen Palms and Cycads, a profusion of the finest Roses, etc., etc. We are glad to see visitors any day (except Sunday), and the Rose Hill Nurseries are easy of access from New York. Trains on the New York, New Haven and Hartford railroad, leaving Grand Central depot (Forty-second street), every hour, pass New Rochelle; Electric Road passing the Nurseries will be found at the station on the arrival of all trains, or we will be pleased to have our 'bus meet visitors.

Those residing on the New York and Harlem Railroad can reach the Nurseries by trolley from Tuckahoe, only twenty minutes' ride.

The New Siebrecht Building, 425 Fifth Avenue, Corner 38th Street

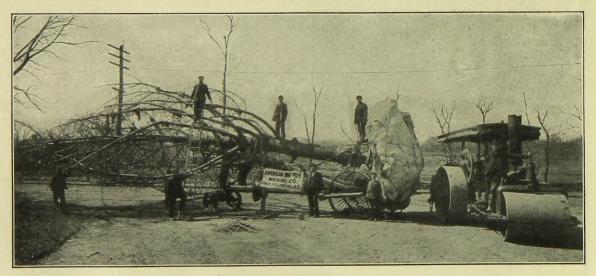

Big Tree Moving

Bird's-Eye View of the Rose Hill Nurseries

PRIVATE ESTATES

New and undeveloped places and gentlemen's country estates furnished and planted complete. The stock of our Nurseries, both for indoor and outdoor purposes, is so comprehensive that everything called for to outfit greenhouses, conservatories, gardens, orchards, or for landscape and lawn decorations, can be furnished from our own establishment and will be guaranteed to give entire satisfaction.

BIG TREE-MOVING DEPARTMENT

We are prepared to move and successfully transplant and guarantee to grow any trees from 6 in. to 36 in. caliper, and from 20 ft. to 80 ft. high, a feat which, under ordinary methods of transplanting trees, cannot be accomplished. Our unique Big Tree-Moving Machines have done this work for the last twelve years with marvelous success.

We have engaged in the laying out, scientifically preparing and planting of fruit gardens and

orchards for the past forty years.

PACKING DEPARTMENT

The most careful attention will be given to packing in order to secure safe arrival and light weight. We promise liberal count, careful labeling and light, secure packing.

New and Rare Plants of Recent Introduction

Ficus Pandurata

FICUS PANDURATA (Fiddle Plant)

A new plant belonging to the Rubber Plant family; A new plant belonging to the Rubber Flant lamily; called the Fiddle Plant on account of the peculiar shape of the leaf, which resembles the body of a fiddle. This plant has been severely tried by us and we find it the most durable and the toughest plant in cultivation, as it seems able to stand any and all forms of abuse. See illustration.

Ready for delivery May 1st. \$3.00 to \$5.00 each.

PHOENIX ROEBELINII

This beautiful palm, certainly the most graceful of all the palm family, was discovered in China a few years ago. The first plants, of which there were only a few, were brought to London and sold at auction. The largest plant was sold for over six hundred dollars. Some seed has been brought over, and the plants from this are now offered in very small quantity to the public. This variety of Phænix is by far the most satisfactory for house culture as it does not grow very tall; in fact, it is known in the trade as the "pygmy Phænix." It is exceptional in the form of its stem and in the elegance and soft texture of its bright green leaves. 5-inch pot-plants, 12 inches high, \$2.50 each; handsome specimen plants, 3 feet high, \$15.00 each.

NEPHROLEPIS SIEBRECHTII

This is a sport from the Pierson Fern, in which This is a sport from the Pierson Fern, in which the plumy peculiarity of the original form is even more distinctly developed than in the original; the side pinnæ being again subdivided and standing at right angles to the direction of the midrib, makes both sides of the frond equally beautiful, while, at the same time, the plant is of much more compact habit, growing only one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes. 6-inch pots, \$1.25 each; 7-inch pots, \$2.00 each. Large specimens, \$5.00 each.

BEGONIA REX IN VARIETIES

We have a grand stock of new Hybrid Begonia Rex. Those who are making collections of Begonias would be well repaid by a visit to our Nurseries and an inspection of our grand collection. Prices on ap-

LADY BATTERSEA New Hardy Hybrid Tea Rose

A seedling variety of great distinctness of character. The growth is vigorous, the shoots long, with fine green leaves, each shoot bearing a flower thrown well above the foliage, and produced singly so as to require little or no disbudding. The buds are long, require little or no disbudding. The buds are long, oval and pointed, and of a beautiful cherry crimson, permeated with an orange shade. The flowers are of moderate size and almost full, with the petals so well together as to retain their form for a long time. When first open the blooms are light rosy crimson, still keeping the orange tinge of the bud, brilliant in the extreme passing to pure soft rose the calcy clear. the extreme, passing to pure soft rose, the color clear

Price, 1st size, 50 cents each, \$5.00 per doz.; 2d size, 30 cents each, \$3.00 per doz.; 3d size, 15 cents each, \$1.50 per doz.

PRINCE OF BULGARIE A Grand New

A very vigorous grower, with large, bright green foliage, beautiful in form of bud; flowers very large and full; the other petals are extremely large, of superb rosy flesh color; very fine and very free. First prize at Paris Exposition. Very much like a superb "Carnot" in form.

Price, 1st size, 50 cents each, \$4.50 per doz.; 2d size, 30 cents each, \$3.00 per doz.; 3d size, 15 cents each, \$1.50 per doz.

" RICHMOND " A Splendid, New Red Rose.

This splendid, new red Rose was raised by E. G. Hill & Co., and is the most valuable addition to the list Hill & Co., and is the most valuable addition to the list of Winter blooming Roses sent out in years. It blooms as freely as the freest of the monthly Roses, is very easy to grow, has splendid foliage and long stems. The color is magnificent, a rich scarlet crimson, the most vivid and rich yet produced in the Hybrid Tea Rose. Unlike other red forcing Roses, it does not "blue" with age.

Price. 1st size. 60 cents each; 2d size. 40 cents.

Price, 1st size, 60 cents each; 2d size, 40 cents each; 3d size, 25 cents each, \$2.50 per doz.

"CORALLINA" New Bedding

A European variety which is splendidly adapted to our American climate. Flowers deep, rosy crimson, large, full and finely formed. It makes beautiful buds, particularly during the Autumn months. It is a constant and abundant bloomer, strong stems and fine foliage, fine for cutting; its vigorous, healthy habit and bright color make it exceedingly valuable for the garden. for the garden.

Price, 1st size, 60 cents each, \$6,00 per doz.; 2d size, 40 cents each, \$4.00 per doz.; 3d size, 20 cents each, \$2.00 per doz.

PALMS

The Largest Stock in Varieties of Palms in the United States

CLASS of plants especially noted for their majestic and very imposing character, and rightly called the monarchs of the vegetable kingdom. They are of great decorative value. Their grand appearance, their magnificent foliage and their universally graceful and imposing habit distinguish them from all other plants. No collection is complete without Palms; they are unrivaled for the decoration of greenhouses and conservatories, parlors and halls, and many establishments have stately structures used especially as Palm houses. Twenty years ago but few varieties of Palms were to be found in collections, as gardeners then generally supposed them difficult to cultivate, but now we find large numbers of species and varieties of Palms, Cycads, Zamias, etc., in nearly all the prominent gardens.

They can be justly recommended for their great usefulness, beauty and easy cultivation; in all modern decorations of churches, public and private festive halls, as well as for floral exhibitions, handsome specimens of Palms are the main factors, and are indispensable.

Foreseeing the steadily increasing taste and demand for these noble plants, we prepared our houses and stock for it, and, at great expense, continued cultivating and increasing our now unlimited supply. We have added, year by year, a number of new, handsome and distinct species and varieties, and our stock is now of such magnitude that it must be seen

Our Hand Book, "The Beautifying of Country Homes," Mailed on Application.

In order to form the least idea of it. As most of our stock is raised in our own plantations and tropical nurseries in Trinidad, West Indies, and cultivated and perfected in our extensive Palm houses at Rose Hill Nurseries, New Rochelle.

N. Y., we are enabled to supply the trade of the country at most reasonable and popular prices.

The culture of most species of Palms is comparatively simple. On an average they give less trouble than the majority of plants, enduring rough usage, smoke, dust and changes of temperature in most heroic fashion. All the species in the following list require for their successful cultivation an average temperature of from 50 to 60 degrees; but when used as decorative plants for greenhouses, conservatories, winter gardens, or even for outdoor decorations, will endure without harm an occasional drop to 40 degrees in the temperature.

ACANTHOPHŒNIX crinita (Arc	eca nobilis). A
Palm of very graceful habit, wit	
fronds. The under sides of the pinns	alæ are a silvery
glaucous color, and the plant is gar.	nished with long
black spines, which give it a very de	corative appear-
ance. \$5 upward.	
ARECA. Fine decorative plants of r	shoot and despe
habit with strong pinnated fronds	obust and dwarf

A. alba\$3 50 to \$5 00 A. Baueri (Kentia Baueri)...... 2 50 to 10 00

A. lutescens. The most beautiful and graceful decorative Palm in cultivation, with light green, arching feathery fronds.....\$\fomath{1}\$1 00 upward

ARENGA saccharifera. The true Sugar Palm of India. \$2.50 to \$5.

ASTROCARYUM Avri. The Murmuru Palm. A very fine pinnated and spinous Palm\$5 00 to \$10 00

A. argenteum. Leaves silvery underneath\$5 00 to 10 00

CALAMUS ciliaris. Beautiful and of very graceful habit, with colored spines. The young specimens are unrivaled for small decorations and for jardinieres. \$5 00 to \$10 00

CARLUDOVICA. Carludovicas are Cy-clanthaceous plants, much like the small Latanias in habit. Their broad leaves are rich, dark green, and they are very useful decorative plants, of rapid and easy growth.

C. palmata\$2 00

CARYOTA. Caryotas are broad, acute, pinnated Palms of majestic habit, with bi-pinnated fronds. The pinnulæ are of a peculiar fish-tail-like form, and the species are admirable for decorative uses. C. sobolifera\$5 00 to \$10 00 C. urens 1 50 to

CERATOZAMIA Mexicana. An excellent Cycadaceous plant of hardy nature, much valued for decorations, and un-rivaled for arranging in Palm houses and conservatories. \$5.

CEROXYLON neveum. The Wax Palm from the Andes; of very striking character, with beautiful, broad foliage, silvery underneath; very fine and of imposing habit. \$7.50 to \$20.

CHAMÆDOREA. The Chamædoreas are Palms with pinnated fronds, and of a dwarf habit; useful for all sorts of dec-

C. Ernesti-Augusti (C. latifrons geonoma.) An exquisite dwarf species, with large leaves, and producing large racemes of flowers, which afterward ripen into scarlet berries..... CHAMÆROPS. During the Summer months all the Chamærops Palms are particularly hardy in the open air. No better decorative plants for lawns and grouping can be found.

C. Fortunei (excelsa)\$3 50 to \$10 00 C. humilis 5 00 to 10 00

COCOS. The Cocoa Palms are without exception majestic forms, with long fronds and narrow pinnæ.

C. flexuosa\$1 50 to \$2 50

C. nucifera. The real fruit bearing species ... \$5 00 to 15 00

C. Weddeliana. A beautiful dwarf and grace-ful species, with very fine pinnated fern like fronds; excellent for jardinieres, table dec-orations, etc.; it bears the same relation to other Palms as the fine Maiden-hair fern does to all other ferns..........\$1 00 to 10 00

ARECA LUTESCENS, WITH ASPIDISTRA LURIDA AT BASE

CORYPHA australis (Livistona australis). An excellent and hardy Palm of compact and robust habit. \$1.50 to \$10.

CYCAS. These are magnificent plants, the true type of the Cycadæas. Of noble and majestic habit, and most impressive, yet they do not grow too large. They are probably the most valuable decorative plants grown, both for indoor and outdoor use, and the cut leaves have recently been made available for funeral wreaths, etc. The Cycas are very hardy; their heavy, glossy, deep green fronds resist alike the gas, cold and dust to which decorative plants must frequently be exposed. We grow them by the thousand, and offer a superb stock.

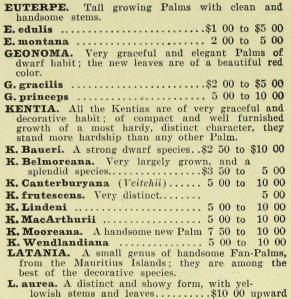

C. circinalis. A handsome species.\$10 00 to \$100 00 C. revoluta. Often called the "Sago Palm," or

Palm of Victory\$1 00 upward.

C. Rumphii. Distinct and rare. Price on application.

DÆMONOROPS. Very graceful Palms, much like the Calamus.

ENCEPHALARTOS Altensteinii. A cycadaceous plant, allied to the Cycas, conspicuous and odd in form, and very showy when grown in Palm houses and conservatories; even small specimens show their peculiar habit. \$20.

L. Borbonica. (See Livistona Chinensis.)

L. rubra. A most distinct species, with large palmated fronds, finely serrated, and of a dark, often red brown, color; a beautiful show plant\$5 00 to \$10 00

elegant Palms, of a conspicuous habit, with palmate fronds; they make beautiful specimens for decorations, and are valuable for almost any sort of general grouping.

 L. grandis
 (Pritchardia prandis)

 grandis)
 The rarest and handsomest Palm of the Fan-shaped type; handsome specimens

 L. horrida
 5 00

 L. peltata
 5 00

Borbonica). Well known under both names—perhaps best under the latter. Probably the most widely distributed Palm for decorative purposes; its shining green fan-shaped foliage, resisting dust and gas, has made it most popular. Of free and rapid growth, and showing its fine and characteristic habit at an early stage, it is deservedly popular everywhere. We grow it in enormous quantities, and offer fine specimens in a wide range of sizes, at from \$2.50 to \$25; smaller plants, \$1 to \$2. See illustration.

MACROZAMIA spiralis. Perhaps the most graceful of all the Cycads, themselves so valuable; indispensable in any collection. \$5.

PHOENIX CANARIENSIS

MARTINEZIA.		
tinct showy Pal		
nules like a fish small specimens	egant, in either	large or

RARE SPECIMENS OF PALMS, CYCADS AND TREE-FERNS

Plants of Extraordinary Size and Beauty

PALMS

UR collection of large, rare and beautiful specimens of every variety of Palms in cultivation is, without exception, the most complete and valuable in this country. All the superb specimens offered here are of perfect and symmetrical form and have for years been grown at the Rose Hill Nurseries with great care. We offer them at prices which will be supplied on application and describe them just as they stand. Those wishing superior specimens to grace any decorative position will find this list of great value.

KENTIA FORSTERIANA

Areca alba. 12 feet; grand specimen.

Areca lutescens. 15 feet, three stems; fine specimen.

Areca lutescens. 15 feet, two stems; fine specimen.

Areca lutescens. 10 feet, one large stem, very well-furnished.
Areca Verschaffeltii. 9 feet, six

leaves; fine specimen. Astrocaryum Mexicanum.

feet, twelve leaves; a beautiful specimen.

Caryota sobolifera. 10 feet; exceedingly fine specimen.

Caryota sobolifera. 8 feet; handsome plant.

Caryota urens. 18 feet; specimen, with three stems. 18 feet; grand

Caryota urens. 12 feet; splendid specimen.

Chamærops humilis. 6 foot clean

stem, 6 inches in diameter; over stem, 6 inches in diameter; over 100 leaves; a magnificent plant, the largest in the country; it is rarely that C. humilis forms a stem, and the only other plant of such size and beauty in cultivation is in Berlin.

Chamærops stauracanthus, feet, nine leaves; fine plant. stauracanthus.

Kentia Belmoreana. Kentia Forsteriana. 26 feet. 25 feet.

Kentia Forsteriana. Kentia Wendlandii. 15 feet, twelve leaves; the largest specimen in cultivation.

Livistona Chinensis (Latania

Borbonica). 12 feet, ten leaves.

Livistona Chinensis (Latania
Borbonica). 10 feet, twelve

Livistona Chinensis (Latania Borbonica). 8 feet, eight leaves. Livistona horrida. 5 feet, eight leaves; grand specimen.
Livistona rotundifolia.

8 feet. twelve leaves: largest known.

Livistona rotundifolia. twelve leaves; fine plant.

Martinezia Lindenii. 10 feet; a beautiful plant.

Phonicophorium sechellarum. 10 feet; grand specimen. Phœnix rupicola. 7 feet; a beau-

tiful plant. Pritchardia Pacifica. 8 feet, eight leaves; handsome plant.

Pritchardia grandis (Licuala). 5 feet, ten or more leaves.

Ptychosperma Alexandræ (Kentia robusta). 16 feet, seven leaves; noble specimen.

Ptychosperma Alexandræ (Kentia robusta). 12 feet; elegant specimen.

Thrinax elegans. 12 feet; a grand specimen plant.

Thrinax elegans. 10 feet, eleven leaves; beautiful. Thrinax elegantissima. 8 feet, eight leaves; very distinct.

Thrinax argenteum. A very distinct and rather robust variety; 6 feet; fine.

Seaforthia elegans (Ptychosperma Cunninghami). 16 feet; a magnificent pair, with beautiful straight stems; very handsome.

Seaforthia elegans. 14 feet; elegant pair.

Seaforthia elegans. 12 feet: elegant, perfect plants.

elegant, perfect Seaforthia elegans. 10 feet: plants.

Verschaffeltia melanochætes. 9 feet, six leaves; probably the largest and handsomest specimen of this very rare species in cultivation under glass anywhere in the world.

We have many other rare varieties of Palms in large specimens of from ten to twenty feet, a list of which will be promptly mailed on application.

CYCADS AND CYCADEAS

Of this very valuable class of plants we have in stock a number of very rare and unsurpassed specimens, a list of which will be sent upon application.

Cycas circinalis. This grand and most magnificent specimen stands twelve feet high, with a clean trunk or stem two feet in circumference, having 50 fine fronds, each eight feet long; perfect in shape, and is probably the finest specimen in America.

Cycas Lehmanii. a noble plant of a most elegant and very distinct species. It is the only specimen in this country so far as is known, and has a clear stem or trunk two feet high and a foot in diameter, with 56 perfect fronds. The plant has a twelve-foot spread; its leaves are of a beautiful arching and graceful character, and measure seven feet in length, with still another new growth of many more new fronds starting.

Cycas Rumphii. This, another grand specimen, is much like the foregoing,

but of a different species; it is of a beautiful compact habit, and its widespreading, handsome fronds are of a somewhat glossy, rich green color. The plant has a two-foot stem or trunk, and a ten-foot spread, with 50 per-fect fronds, each six feet in length; also the only specimen of its kind in the country, so far as is

cas revoluta. (Commonly called the "Sago Palm.") Noble specimens, with stems rully six feet high, well proportioned, with upwards of 100 Cycas revoluta. fronds-a magnificent pair.

Cycas revoluta. A beautiful specimen, with five-foot stem, well proportioned, and with 40 fronds. all perfect.

LIVISTONA CHINENSIS (Latania Borbonica)

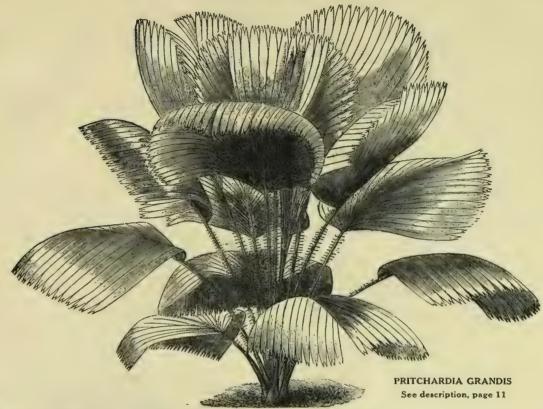

A splendid plant, with four-foot Cycas revoluta.

stem; of good shape, with upwards of 40 fronds. cas revoluta. Elegant specimens, three-foot Cycas revoluta. stems; in fine shape, with upwards of 40 leaves; a magnificent pair.

Cycas revoluta. A fine specimen, with a 31/2-foot stem; a magnificent plant, with splendid head of perfect leaves.

Cycas revoluta. A beautiful specimen, with threefoot trunk and perfect head.
Cycas revoluta. Grand specimens; a fine pair, with
21/2-foot stems and good heads.

Cycas revoluta. Magnificent specimens, with two-foot stems, well proportioned.

Cycas revoluta. Very handsome specimens, with eighteen to twenty-inch trunks, all with magnificent heads.

Splendid half-specimens, Cycas revoluta. trunks from one to 11/2 feet, all with perfect heads

and a number of leaves.

Dion edule. A grand specimen, with a clear stem of three feet, and a perfect head of 10 fronds.

Dion edule. Handsome specimens, with one-foot

stems and good heads.

A most magnificent specimen, Zamia Lindenii. with a two-foot clear stem, and 14 elegant fronds, six to seven feet long.

Zamia Roezlii (true.) Beautiful specimens, seven feet high, with seven perfect fronds and strong trunks.

Zamia Mexicana. Beautiful specimens, of compact, dwarf habit, and dark purplish green, gracefully curved leaves, about four feet high.

TREE FERNS

A remarkable class of ferns, which of themselves form stems or trunks from the top of which they throw their stately fronds in great profusion.

Besides this list of extraordinarily large and handsome specimens, we have many half and three-quarter specimens closely approaching the sizes mentioned and described below. For full list of Tree Ferns, see Ferns.

Alsophila australis. Handsome specimen, with stem of four feet, crowned with eight large perfect fronds of a charming rich green color; the plant has a six-foot spread.

Cyathea dealbata. A grand plant, with a seven-foot stem and 15 fronds; this is a rare specimen.

Cyathea Smithii. A perfect pair of this grand species, with five-foot stems, and upwards of twenty fronds; very rare variety.

Cibotium Schiedei. A very beautiful and graceful specimen, which is established upon a six-foot stem of Cyathea dealbata, with 12 fronds.

Cibotium regale. One grand specimen of this hand-

Cibotium regale. One grand specimen of this hand-some variety, with rich light green fronds, which strongly contrast with the golden yellow silk-like fur on the leaf-stalks; the stem is three feet, with beautiful top.

Cibotium princeps. Magnificent specimen of this noble and vigorous-growing tree fern, about six feet high, with about the same spread, and many

DICKSONIA ANTARCTICA (Belantium).

Of this most stately Tree-Fern, a native of Australia and New Zealand, we have an unsurpassed collection, with fibrous stems or trunks from six inches to two feet in diameter, and varying in height from three to twenty feet. The tops or crowns of these grand, erect stems are surmounted with numerous lace-like fronds of a rich green, from three to six feet long. These choice Tree-Ferns are indispensable in conservatory decorations or furnishings, and are easily cultivated and cared for, requiring only ordinary attention, and they produce a stately and tropical effect wherever placed.

Prices of these extraordinary fern specimens range from \$25 to \$75 and upward to \$200 each.

Prices for any of the specimens, together with further particulars in regard to the plants, handling, etc., promptly supplied on application.

Our Hand Book, "The Beautifying of Country Homes," Mailed on Application.

ORCHIDS

The Largest and Oldest Orchid Establishment in America

(We Introduced Orchids in a Commercial Way in This Country)

T IS WELL KNOWN that we have one of the most extensive and valuable commercial collections of Orchids in America, to which we are constantly adding, both by our own propagation of the most desirable species, and by large importations from the various quarters of the globe in which are found growing these strange and most beautiful members of the floral kingdom.

Orchid culture and propagation has always been with us a labor of love as well as a matter of business; wherefore we may be pardoned for our enthusiasm. Indeed, anyone who has ever been engaged in the culture of Orchids will agree with us that it is a most fascinating employment, interesting to every sense of man, and filling him with admiration and reverence for the great Creator of whose wonders these are but a fragment. There is something about these plants which, while they may attract first only from curio-ity aroused by the grotesque form of a particular species, will always hold the lover of Nature with triple bands of interest, surprise and admiration.

Orchids Have Become Popular.—But a short time ago comparatively few people knew anything about this class of plants and quite often the question was asked, "What is an Orchid?" Since then, however, nearly every lover of flowers has become acquainted with the Orchid, and not only knows them in their various varieties and wonderful colors, but as well cultivates them in greenhouses and conservatories.

VIEW IN ONE OF OUR ORCHID HOUSES-CATTLEYA TRIANAE IN BLOOM

Orchids the Flower par excellence.—There is no other class of plants in cultivation which can vie with the Orchid in production of beautiful and wonderful flowers; with this beauty, they combine highly artistic forms and are as attractive as they are highly interesting. The flowers, also, are of great substance, possessing immense vitality and, while others fade in a few short hours, those of the Orchid will keep fresh for weeks, and it is this fact which adds so much to their value over all other flowers. The collection we here present includes all the very choicest varieties and can be readily cultivated. We have given every variety in the list below a designating mark, and here append the outlines of culture for each class.

Cool House Orchids, or all those marked c in the list which follows, require a so-called cool treatment. A Winter temperature of from 50 to 55 degrees, with plenty of moisture, is best suited to them, and in Summer they should be kept as cool as possible; the direct rays of the sun should never reach them. The principal species which constitute this section are Odontoglossums, Masdevallias and Oncidiums, together with a few sorts of Lælia, Cattleya, Maxillaria, Epidendrum and Disa, all of which are very beautiful and most satisfactory flowering Orchids. The principal thing in successfully growing these Orchids is to keep them cool and moist, and to admit plenty of air.

Orchids for an Intermediate Temperature, marked i in the following list, can be grown in any ordinary greenhouse or, where the facilities are limited, in those parts of houses where cool and hothouse Orchids are grown which

may favor their requirements as to a little cooler or warmer temperature.

Hothouse or East Indian Orchids, marked h in this catalogue, include many magnificent species. They are usually grown in a stove-plant house, or in any house having a temperature of from 60 to 70 degrees, and a moist atmosphere.

NEW, RARE AND	SELECT ORCHIDS
ACINETA. Epiphytal plants of stout habit, bearing showy, fragrant flowers in drooping racemes. They are related to the Peristeria or Holy Ghost Orchid. All the species are grown in baskets. i.A. Barkeri	hAngræcum eburneum\$3 50 to hA. eburneum superbum. A grand specimen three feet high and the same in spread\$3 50 to 10 00 hA. eburneum virens\$3 50 to 5 00 hA. falcatum\$3 50 to 5 00 hA. Leonis (Eranthus Leonis). A very distinct Orchid, of dense, rather dwarf habit, with stiff leaves of a fleshy texture; many flowers, in branching spikes, of pure white and sweet scented; handsome and noteworthy
and bloomer\$10 00 hA. crassifolium. This is not a new variety, but certainly is one of the most free flowering and easiest cultivated, and a truly beautiful and bright, showy sort. We offer a few perfect specimens, twelve inches high with twelve to fifteen leaves. Large specimens, \$10; smaller\$2 50 to 7 50 hA. crispum	BRASSAVOLA. Epiphytal plants. They should be grown on a block. B. glauca \$1 50 to \$2 50 B. Digbyana (Lælia Digbyana) 1 50 to 2 50 BRASSIA. This genus is closely allied to Oncidium. Best grown in pots, with fibrous peat and moss; should never be allowed to get dry. B. maculata \$1 50 to \$3 00 B. maculata major \$3 50 to 5 00 B. verrucosa grandiflora 1 00 to 1 50 CALANTHE.
Grows more open than any other of the genus; its flowers are fragrant and of a beautiful combination of rosy purple and white. Large specimens, \$10; smaller \$2 50 to 5 00 \$A. ordoratum	A very distinct genus. The several species and garden hybrids are among the freest flowering and most satisfactory Orchids. They are of easy culture. The majority of them are terrestrial Orchids, and therefore should be potted in loam and leaf-mold, and given a liberal supply of water when growing. hC. oculata gigantea. This very rare and truly handsome Calanthe is certainly the most beautiful and showy of the genus. It has been commonly named the "Christ Orchid," as the pure white, five petaled flower, with the rich blood red blotch in the center, very correctly represents the wounded hand of the Saviour on the cross. \$5 00 upward hC. Fournerii \$5 00 upward hC. Regnierii. Quite a rare acquisition, as its very beautiful and bright, striking flowers, with a wholly rosy pink lower petal, appear much later than those of most other varieties. CATTLEYA.

The species of this popular genus rank among our finest Orchids; they are general favorites, and we are glad to find that they are beginning to be extensively cultivated in this country. The pseudobulbs are, in many cases, elongated and thickened, and the dark, massive, evergreen foliage renders the plants peculiarly attractive. The flowers are all large and elegant, and can scarcely be surpassed for their sparkling richness and depth of color, the most frequent tints of which are violet, rose, crimson, magenta, white, yellow, mauve and purple, with their intermediate shades. The flower scape, which is enclosed in a sheath, issues from the top of the stem, and a single spike sometimes con-tains as many as from ten to twenty flowers. The plants are easily grown in baskets or pots, with a compost of fibrous peat and moss, good drainage and a liberal supply of moisture when growing; they should always be shaded from the direct rays of the sun. (See view of one of our Cattleya houses.) hC. amethystina \$1 25 to \$2 50

i C. aurea. This lovely Cattleya is from Colombia, and is quite distinct from C. Dowiana aurea, with which it is often confused. It is of strong growth and free flowering: is of strong growth and free flowering; very distinct. It flowers in the Autumn;

thrives in a coomouse, and it there grows to perfection. It is citron colored and citron scented; should be grown on blocks of wood \$1 00 to 2 00 hC. Crispa \$1 50 to 3 00 iC. Dowiana \$5 00 upward iC. Eldorado \$1 50 to 5 00

CYMBIDIUM.

These are all evergreen plants of a noble and decorative aspect, with closely set tufts of long and somewhat narrow leaves; most of them are large and vigorous plants, with short pseudo-bulbs, from which the leaves and flowers proceed. The flowers are large, beautiful and very attractive, the racemes being often three feet long and remaining perfect for many weeks. Cymbidiums require plenty of pot room for their many roots; we grow them most successfully in rough peat

and	moss, with good drainage.

EPIDENDRUM.

We offer only the choicest species in this extensive genus. They are all of very luxuriant and rapid growth, easily cultivated, and can be grown upon blocks of wood, in pots or in baskets, with fibrous peat and sphagnum moss, in equal parts, for potting material. They delight in plenty of moisture nearly all the time. i.E. atropurpureum\$2 00 to \$3 00

GONGORA.

This genus is much like the Acroperas in habit but larger; they require the same treatment. hG. atropurpurea\$1 00 to \$1 50 75 to 1 50

hGongora	maculata\$2 50 to	\$4 '00
nG. trunca	ta	4 00

This is a lovely and valuable genus of epiphytal Orchids, most of the species being vigorous and compact in growth, with evergreen leaves much like the Cattleyas to which they are closely allied. Their flowers, which are large and distinct in color and very handsome, are produced on spikes from the top of pseudo-bulbs. They are unsurpassed for cut flower purposes. Some of them may be grown upon blocks or rafts, though they will all thrive better in baskets or pots, with a compost of fibrous peat and good drainage.

In popular estimation this is the grandest genus among all the Orchids, and its magnificent flowers do indeed outshine all others. The plants are of singular habit and birdlike appearance when looking at them suspended upon rafts, blocks or baskets, with their beautiful leaves, some of which are of rich olive green, while others are whitish, mottled and marbled, on a brown green ground; all the leaves are of a very fleshy texture. In cultivating a number of different species some may be had in bloom the year 'round. The flowers are produced upon long, branching scapes which proceed from the axils of the leaves near the base, there being no pseudo-bulbs to this Orchid. The flowers come in great profusion, more than 300 having been counted on a single plant; the color of these beautiful and delicate flowers and their construction is most
tiful and delicate flowers and their construction is most
wonderful. The plants need constant high temperature, and during their growing season, from March to October, require plenty of moisture. Fibrous peat, charcoal, potsherds and live sphagnum moss are what they delight to grow in

COLLECTIONS OF ORCHIDS

\$5 00 upward

In forming collections of Orchids, whether large or small, it is of the utmost importance to begin aright if, besides being beautiful, we wish them to be practical and useful. Thus, in order to have Orchids in bloom throughout the year, a careful selection of such varieties as will give a succession of bloom is necessary. Such assortments may also include a wide range of form and coloring in the flowers. All who are not familiar with the many species, varieties and habits of these plants will find it perfectly safe to intrust the selection to us, as we often make up such collections for customers, always to their entire satisfaction. We need only to know for what purpose the Orchids are desired, and to have some idea of how much money the customer wishes to invest in the collection. Botanical collections of Orchids are formed in quite

a different way; by selecting from different genera, species and varieties; this we undertake also, performing the work in a scientific and satisfactory manner; the purchaser, however, must give us an idea of the number of specimens wanted and the number of dollars to be invested. The preceding extensive list includes all the best and most useful varieties.

Some of the very rare and costly varieties of Orchids which we have in stock are not mentioned in this Catalogue, as there are very few specimens of each of them-in some cases only one. Bui to all who desire very rare Orchids, and will address us, mentioning this fact, we will give particulars of such plants, sending samples of their flowers when this is

As might be supposed, among our vast collection of Orchids there are new and rare varieties of great beauty and value constantly coming into bloom, some of them for the first time. We keep the more enthusiastic of our patrons wellinformed concerning the flowering of these plants, and would suggest to all who are forming collections of Orchids that they send us their names and addresses so that we may advise them of the blossoming of any new or rare plants.

OUR ORCHID COLLECTOR

ORCHID MISCELLANY

The culture of Orchids presents no special difficulty; there are no "secrets" which must be found out in order to succeed, but all who wish more explicit directions concerning their culture than can be given here will be furnished same on application.

Orchid Peat.—We would also call especial attention to the unusually fine quality of our fibrous peat, acknowledged to be the best fibrous peat in this country. We supply it in large and small quantities; also live and dry Sphagnum, Orchid-cribs and Pots, in fact, all requisites for the Orchid house, a detailed list of which will be found in the regular list of Supplies in the last pages of this Catalogue.

TROPICAL GREENHOUSE PLANTS

HIS important Department includes all the best genera, species and varieties of flowering and foliage plants which are grown under glass, either in a stove or warm-house temperature, or in a greenhouse or cool-house temperature. The majority of tender flowering bulbs forms a sub-department; the bulbous and tuberous forms, grown for their beautiful leaves, are classed here with other foliage plants.

Plants requiring a stove or warm-house temperature are marked with s. Those that grow best in a cool or

greenhouse temperature are marked with g.

Riddinious temperature are marked with y
ABUTILON. A class of showy flowering plants, with bell shaped flowers, produced in profusion. They
are of good habit and very decorative in any sit- uation.

Dicksoniana 5 00 to 7 50 \$ N. distillatoria. The true species 2 50 to 5 00 \$ N. Dominiana. A fine, robust growing hybrid \$2 00 to 4 00
ly produced. A beautiful plant	This curious and interesting class of plants thrives best in a warm, moist atmosphere, and all the forms are usually suspended from the roof in baskets. Complete shade and a compost of two parts peat with one of sphagnum moss, plenty of drainage and an abundant supply of water, will grow them to perfection. They should always be thoroughly shaded. Our collection of these highly ornamental plants is unequaled in America, many new and beautiful varieties obtained by hybridization, which are not to be found elsewhere, being included. The large size of their interesting pitchers, the brilliant coloring and variety of form, make them desirable for any collection of plants. 8 N. ampullaria. Has light green pitchers; of robust growth. \$2 00 to \$4 00 \$ N. ampullaria vittata. Striped pitcher. \$2 00 to \$4 00 \$ N. ampullaria wittata. Striped pitcher. \$3 00 to 6 00 \$ N. ampullaria major. Beautifully mottled. \$3 00 to 6 00 \$ N. Curtisi. A beautiful hybrid. 5 00 to 7 50 \$ N. Curtisi. A heautiful hybrid. 5 00 to 7 50 \$ N. BULBS AND TUBERS FOR STOVE AND GREENHOUSE CULTURE

ANY OF our most showy and brilliant flowering plants have bulbous or tuberous roots which, with but a minimum of care, are very free of bloom. Our Amaryllids will be found worthy of especial attention; we make a specialty of this superb genus, and are headquarters for it. Some of the species are peculiarly adapted to house culture, thriving exceedingly well in an ordinary window, and presenting their brilliant flowers in Winter and early Spring. We have many rare species, and grow them to great perfection at our Tropical Nurseries in Trinidad. The beautiful new hybrids are fine for early forcing.

SUCCULENT PLANTS

Including Agaves, Aloes, Echeverias, Euphorbias, Mesembryanthemums, Rocheas, Sansevieras, Sedums, Sempervivums and Cactuses.

UCCULENT plants are useful in many situations, both indoors and in the garden or on the lawn. They are especially available for rockeries, and lend themselves to outdoor bedding in sunny places in a most distinct and effective way. Nearly all of the Agaves, and many of the Aloes, and others of the robust habit, make handsome ornamental plants on lawns, or for decorating entrances, balconies, etc., affording a most admirable contrast to the tropical foliage plants, while the extreme beauty and regularity of "carpet" or "ribbon" beds, wrought out with Echeverias as the principal factor, is well known. Many of the Cactuses and Mesembryanthemums are noted for their brilliant and beautiful flowers of great range of color and form and often richly fragrant; while the strange and wonderful shapes and habits of the Euphorbias, Stapelias and Orassulas win for them much admiration.

This class of plants is rapidly returning to public favor, and has the great merit of requiring a minimum of care and attention from the planter. We keep in stock all select ornamental forms of succulent plants, and furnish a Descriptive Price List to all who ask for it.

PRIVATE COLLECTION OF CACTI

Select Collections of Cactuses

The order Cactaceæ includes many separate genera of succulent plants—Cereus, Echinocactus, Echinocereus, Epiphyllum, Mammillaria, Phyllocactus, Pilocereus, Rhipsalis, etc. The different types and varieties are wonderfully varied and curious, and the majority are very ornamental. The prices for Cactuses vary from 25 cents to \$1, according to size and variety. We furnish prices, together with a descriptive list, upon application.

A Bed of Cactuses, such as is here represented, is most unique and attractive in appearance, and requires but a minimum of attention if planted in a dry and sunny spot. Prices for sufficient plants for such beds will be given on application.

We will select twelve distinct varieties, including the best species, for \$3, \$5 or \$10, according to size and varieties. To those desiring to form collections of greater extent we will be pleased to supply lists of the best species, with prices. Cactuses for bedding can also be supplied by the dozen or hundred at very moderate prices.

The Largest Horticultural Establishment in America.

FERNS AND SELAGINELLAS

N

COLLECTION of plants is complete without Ferns and Mosses. Their beautiful foliage seems especially fitted to combine with all brilliant and lovely flowers, and to supplement the majestic elegance of the Palms and Cycads we have the large Tree forms. A vast variety there is, too, among them, from the delicate, transparent green fronds of the finer Adiantums to the bold and handsome foliage of the Nephrolepis and Pteris; or from the lovely Selaginellas, carpeting the ground, to the stately and tall Tree Ferns.

The appreciation of Ferns has increased vastly of late years, and they are now extensively used for all decorative purposes and in all elegant floral work. Our extensive and carefully grown stock affords ample opportunity for buyers to select any forms which may please their fancy or suit their convenience. New and really valuable species are constantly

being added to our stock.

ADIANTUM.

A large genus of handsome tropical and subtropical Ferns, commonly known as "Maidenhair" Ferns, with light, filmy fronds and slender, glossy black stems. Their value is well known, and they are appreciated the world over.

TREE FERNS

HE stately grace and elegance of the wonderful Tree Ferns is beyond description. Vying with the Palms, they are of the greatest beauty and utility for all decorative purposes and have a charm belonging to no other order of plants. No tropical greenhouse is complete without them. We are constantly importing fine, healthy stems of all the leading varieties, as well as some new and rare species, all of which we offer at moderately low prices. We have also many large and extra large specimens of extreme beauty, in perfect condition, the prices of which can be had on application. For particulars as to varieties and sizes of these specimen Tree Ferns, see page 12.

ALSOPHILA. A magnificent genus, with handsome, upright trunks and ample foliage of rather drooping

A. australis. One of the finest and most striking species. The large, plumy fronds which form the crown are silvery and glaucous underneath, showing delicate contrasts in green. This Tree Fern is beautiful in all stages of growth. The clear, upright trunk resembles that of a Palm, but is not so firm in texture.....\$1 00 to \$5 00

A. capensis 3 00 to 10 00

A. excelsa. A splendid, rapid growing species, that quickly becomes effective; the delicate, wide spreading fronds are dark green above, paler beneath.....\$2 00 to ASPLENIUM. These Ferns form handsome specimens, and are graceful and distinct in character.

A. decussatum. From the Polynesian and Malaysian Islands................\$2 00 to \$5 00

A. arboreum luteum. One of the largest and finest species in the genus, and of peculiar and interesting habit......\$2 00 to

BLECHNUM Braziliensis. Of peculiarly graceful habit, with broad and finely divided fronds which, when young, are a rich wine color finally changing with age to dark green. \$1.50 to \$5.00.

CIBOTIUM. Among the best of the Tree Ferns and sometimes included under Dicksonia. The leaves are long, wide spreading and finely cut.

C. princeps (Cyathea) ...

\$2 50 to \$10 00

C. regale 2 50 to 10 00

C. Schiedei 2 00 to 5 00

ATHEA. A superb genus, showing marked peculiarities of form and habit. CYATHEA.

C. dealbata. The most elegant of all the speelegant of an the spe-cies; broad, dark green fronds, with a silvery under surface. \$5 00 to \$10 00

C. Smithii10 00 to 20 00

DICKSONIA. This is perhaps the most widely known genus of these grand plants. All the species are fine.

D. antarctica. A grown specimen of this is majestically beautiis majestically beautiful; the tall and heavy stem is surmounted by gracefully arching fronds of a soft and rich green, which are of a very firm and lasting texture; one of the most popular Tree Ferns. popular Tree Ferns.

\$5 00 to \$20 00

D. Schmittii ..10 00 to 20 09

D. squarrosa .. 5 00 to 10 00

AZALEAS AND RHODODENDRONS

Including Both Tender and Hardy Species

O

UR collection of these superb shrubs or dwarf trees, so indispensable for Winter flowers, or for massing in bold outdoor groups, is easily the largest and choicest one in America. As they are most effective when intermingled, either for greenhouse or lawn decoration, we group them under one general head, including both tender and hardy species. They are grown in fine shape and well rooted. All tints and shades of color are represented in the best types of flowers.

Varieties of Azalea Indica

For Winter and early Spring flowering, the greenhouse Azaleas become more popular every year. Perhaps no other class of plants yields such a brilliant display of flowers for so little care. The experience of many years has taught us that the dwarf standard or crown head is decidedly the best form in which to grow Azaleas for this country, and we therefore offer only plants in that shape. The following collection embraces all the very best and most distinct sorts of both old and new varieties:

ONE OF OUR AZALEA INDICA VARIETIES

A. Borsig. Pure white; a standard old variety.

Alba speciosa plena. Fine, double white.

Apollon. Brilliant red.

Baronne de Vriere. Large white flowers, ribboned with light red.

Baron Nathaniel von Rothschild. Double purple violet.

Bernhard Andrea. Double; bright rose.

Bernhard Andrea alba. Fine; pure white.

Candidissima. Excellent; pure white.

Cassandra. White, pointed with red.

Chas. Darwin. Double white, pointed rose.

Ch. Encke. Rose, edged with violet.

Comte de Chambord. Very large; salmon rose.

Comtesse de Flandres. Striped salmon rose.

Deutsche Perle. Double white; good for bouquets; one of the very best Azaleas.

Distinction. Fine large rose flowers.

Dr. Liebig. Highly colored, rich crimson; large and full; very floriferous.

Duchesse Adelaide de Nassau. Amaranth red and vermilion orange; very large and finely formed.

Duc de Nassau. Dark rose carmine.

Flag of Truce. Very large; double white; very fine.

Gloire de Belgique. White, striped with carmine. Grosfurstin Helene. Orange and deep brown spots.

Gustave Guilmot. Striped flowers; good for forcing. Harlequin. Striped and blotched with rose and violet. Herman Seidel. Double; lively rose.

Le Flambeau. Very deep crimson.

Mad. Louise de Kerchove. Large white flowers with orange blotches and flesh colored circles.

Mad. J. E. Plancheon. Large flowers of clear white, striped yellow.

Mad. L. Van Houtte. Fine large scarlet flowers, striped with white; extra fine.

Mad. Van der Cruyssen. By far the best flower of its color; very large; deep rose, a vivid and brilliant color; in our judgment one of the best Azaleas in cultivation.

The Largest Horticultural Establishment in America.

Marshall P. Wilder. Double white, dotted and striped with lilac rose; a new color.

Marquis of Lorne. Orange, with yellow blotches. Memoire de Louis Van Houtte. Very large brilliant rose flowers.

Meteor. Double bright rose. Narcissiflora flore pleno. Double white.

Oswald de Kerchove. Lively lake rose, with fiery blotch; splendid habit.

Pauline Mardner. Rose; double; a fine sort.

Pluto. The darkest and richest blood red, large flowered Azalea.

Princess Charlotte. Lively deep rose.

Roi de Beauties. Rose, edged with white.

Roi de Holland. Fiery red; very free flowering.

Roi Leopold. Double orange.

Sacountala. Very floriferous; white flowers, double and large; fine market plant.

Senator Van Camp. Very large, double; lively carmine, with deeper center.

Souvenir de Arthur Veitch. A very large single flower of satiny salmon crimson, blotched deep red.

Souvenir de François Vervæne. White, striped rose; a very pretty flower.

Souvenir de Prince Albert. A large and double light rose and variegated flower.

Vesuviana. New. The best double variety ever intro-duced. Coloring is superb.

Vesuvians. Rosy orange red blotched white; very bright and distinct.

Price for strong plants, \$1 to \$2 each and up.

Mar All plants in this collection are of perfect shape, measuring from 1 to 11/2 feet high; their beautiful and symmetrically shaped heads are about a foot in diameter, all set with buds in season. They have been carefully selected with reference to good form and distinct coloring in their flowers. Per dozen, our selection, \$10; purchaser's selection, \$15; or 100 plants of this collection, \$75; 50 at 100 rate. Fine specimen plants at prices according to sizes and varieties, always in stock.

RHODODENDRONS

The Rhododendrons, both tender and hardy, are magnificent shrubs, unsurpassed for all sorts of indoor and outdoor decoration. Properly planted and cared for, their beauty increases with every year. For outdoor planting we offer only perfectly hardy varieties, knowing that only such will prove satisfactory. The splendid effects that they give when planted in masses may be seen in many public and private pleasure grounds and gardens, for which we have supplied shrubs, in and around Newport and New York. In greenhouse Rhododendrons, besides the species and varieties named in the short and select list below, we can supply any other good sorts that our customers may desire, at reasonable prices. See offer of Special Collection below.

Greenhouse Rhododendrons

Our collection of tender varieties of Rhododendrons for greenhouse culture and decoration includes the best and most distinct varieties. They are chiefly hybrids of R. arboreum and the Himalayan species of R. ponticum. The shrubs are shapely, vigorous and well rooted, equal to any ever sent out.

GREENHOUSE GROWN RHODODENDRON

Brilliant. Bright, deep scarlet; the finest of its color. Diadem. Orange scarlet, tinted with carmine.

Duchess of Connaught. Brilliant vermilion red.

Duchess of Edinburgh. Brilliant scarlet, shaded with crimson.

Favorite. Light, satiny rose, with white tube and crimson filaments.

Jasministorum. (Species.) White, with pink eye; very delicate and beautiful.

Lord Wolseley. Bright orange yellow, tinted with rose toward the margin; truss large; plant vigorous and free blooming.

Princess Alexandra. White, with faint blush tinges. Princess Frederica. Light buff yellow, with a faint tinge of rose at the margin.

Triumphans. Crimson scarlet, with large, globular truss; a splendid variety, distinct and brilliant.

Strong plants, well set with buds, \$1 to \$5 each. Special rates on large quantities.

We offer a fine collection of Greenhouse Rhododendrons in 20 different sorts at \$2.50

IVIES IN TUBS

We have a splendid collection of specimen globe shaped and Pyramid Ivies, ranging in height from 3 to 7 feet. These are well furnished with foliage and require only ordinary attention to preserve their beauty and contour. They are distinctly ornamental and will do much to satisfy the desire of those who do not care for Bay Trees. \$5 to \$20.

Ivies in pots. Fine large plants, 6 to 7 feet high. \$2 to \$3.

ROSES—Everblooming

Best Varieties for Greenhouse and Winter Blooming

These varieties we can furnish on their own roots or grafted, 2½ to 3½ inch pots, \$15.00 to \$35.00 per 100

American Beauty. Deep brilliant rosy carmine.

Bridesmaid. Deep brilliant pink.

Creamy Madame Hoste. white.

Perle des Jardin. Rich vellow.

Killarney (New Irish Rose).

Deep shell pink. Richmond. Madame Chatenay. Recarmine, shaded darker.

The Bride. Pure white. Kaiserin Augusta Victoria. Pearly white.

Liberty. Deep crimson scarlet. Austrian copper, and yellow, and Sunrise. scarlet and yellow, and turning to dark red copper, scarlet inside.

Creamy yel-Golden Gate. low with pink edges.

Sunset. Orange yellow with rich orange and chrome yellow center.

Franz Deegen. Orange shade,

deep and rich. Belle Siebrecht. Brilliant deep rich pink. Meteor. Rich velvety crimson.

ROSES—Noisette

Tender Climbing

75c. each; extra large, \$1.50 each.

Climbing Papa Gontier. Rich cherry red.

Climbing Perle des Jar-din. Yellow.

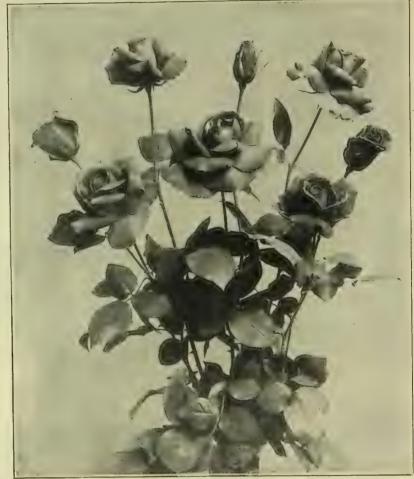

Climbing Wm. Allen Rich-

ardson. Coppery yellow.

Climbing Marechal Niel.

Dark golden yellow.

Climbing Gloire de Dijon. Rich creamy amber color.

RICHMOND ROSE

We have a large stock of Hardy Everblooming Roses, bush and standards. See our Nursery Catalogue

NEW AND RARE CHRYSANTHEMUMS

Herewith we offer a carefully selected list of the best of the new and rare varieties shown at the exhibitions last sea-They are all very distinct and marked improvements over previously introduced sorts,

No flower makes a more magnificent display in the Autumn than these, with their almost endless variety of form and colors, ranging from the purest snowy white, delicate pink and rose, through all the shades of brilliant yellows and deep reds. Set out the plants in a sunny, sheltered location, in good, rich soil, using plenty of well rotted cow manure. Water freely and keep well cut back until the first of August. If wanted for indoor blooming, they should be lifted about the middle of September, potted, watered thoroughly, and set in a shady place for a few days; afterward expose them to the full light, in a temperature not higher than fifty degrees.

Beatrice May. A splendid white variety, of the largest size. It is unsurpassed in stem and foliage and has a splendid habit; dwarf, strong and stocky. The foliage comes up to the flower. Flowers on terminal buds taken in September show a flush of pink on the petals.

Ethel Fitzroy. An early variety, color an orange amber with red shadings which is very attractive. A magnificent flower, very large and handsome; a bold, fine incurved, Japanese type with broad, curling petals. A very popular variety and one of the very best in the list of new sorts.

The Largest Horticultural Establishment in America.

TYPES OF WELL GROWN GREENHOUSE CHRYSANTHEMUMS

C. Montigny. A very large, globular, closely incurved flower with rather narrow petals; yellow with light lacings of red on the edges of the petals. Λ grand exhibition variety. Mid-season.

Dolly Glide. A grand grower, color a soft creamy white, with broad and heavy petals. Not the largest, but splendid form, strong, erect stems and fine

Japan. A very unique variety, imported from Japan. The color is an exceedingly rich orange yellow, with citron red at the base of the petals. It is distinctly Japanese in shape, loose and graceful, with the ends of the petals curiously hooked and cleft. Very useful for loose bunches of flowers. It makes a splendid plant for growing in pots.

Mrs. D. Willis James. A rich, warm shade of chestout terra cotta with an old gold reverse. It is very early; perfect flowers were certificated in New York October 9th. Fine for bush plants, as in that stage

the flowers are brilliant red. A nice dwarf grower with splendid stem and foliage.

Mrs. John E. Dunne. A splendid terra cotta, with just enough pink and golden yellow to brighten it and make it most attractive. It is of dwarf habit, stocky, with fine stems and foliage. A beautiful flower and grand either for exhibitions or for cut flowers there leaves flowers; very large.

Jeannie Nonin. A grand, late, globular white. For Thanksgiving Day and later this has no rival. It is a splendid flower, keeping well long after being cut. Won the silver cup at Chicago for the best white. A stately flower and the most valuable of

recent introductions for cut flowers.

Mrs. Henry Part-ridge. The most satridge. The most satisfactory deep crimson variety yet introduced; it has a bronze reverse. It bronze reverse. It never damps the petals and opens without any shading.
The shape of the flower is open, petals loosely overlaid, showing the reverse slightso that the grand color is displayed to the best advantage.

Mme. G. Rivol. A yellow sport from Mme. Paolo Radaelli and a splendid, deep color. The growth is splendid and it is a useful sort for all purposes.

Morton F. Plant. This

is truly a magnificent is truly a magnineers variety. Immense blooms on the style of Viviand-Morel, but twice as large. The center stands high foul the rotals follows. center stands high and the petals fall away from it in a graceful, wavy shower. The color is a grand, true, clear, rosy pink, deep and lustrous, clistoning in the sunglistening in the sun-light. It scored 95 points on exhibition and commercial scale. a remarkable record. The stem and foliage are grand. We can-not recommend this too highly either for exhibition or commercial use. Price, 50 cts. each, \$5.00 per doz.

T. Richardson. Grand new light pink variety. Color the same as the Enchantress Carnation. A delicate blush. Stem strong and splendid foliage. Won first prize in New York. Price, 50 cts. each, \$5.00 per

doz.

G. J. Brooks. Crimson maroon with reverse of plum color and touches of white; a loosely formed flower of the incurved type, very graceful, showing the unique coloring at its best. The form is excellent and the finish to the flower splendid. Strong stiff stems and splendid foliage. Fine for exhibitions.

Lady Cranston. A sport from Mrs. Barkley. It is pure white with a vivid pink center, unique and distinct; a sensational variety.

Mrs. J. A. Miller. A deep red and dwarf sturdy.

Mrs. J. A. Miller. A deep red and dwarf sturdy grower. One of the largest flowers, and held a com-

manding position in the exhibitions.

Mrs. F. F. Thompson. An informal flower of enormous size. The form is deep and incurving, the petals twist and curl like a mass of ostrich plumes. Color pink with creamy white center. A grand exhibition sort.

hibition sort.

hibition sort.

Matchless. A magnificent deep Indian red. The form is a fine type of the reflexed Japanese which displays at its best the beautiful rich color effects of the flower. It is a variety of very easy growth, fine habit, and one of the best for keeping long after being cut. In full bloom about October 15th.

Old Gold. A charming color, aptly described by the name. The flower is not one of the largest, but its lack of size is made up by the splendid stem and foliage. It is of unusual excellence for growing in pots and for use in decorative effects.

pots and for use in decorative effects.

Valerie Greenham. A beautiful, bright pink variety, shading deeper towards the center and lessening slightly towards the extremities. The coloring is charming, one of the best in its type. The petals are extra long and they droop and curl in the most lavish profusion, forming one of the grandest specimens of the drooping Japanese type. It has been a uniform winner at the exhibitions.

"GOLDEN BABY." Forms a compact bush about a foot high and covering itself with hundreds of golden yellow double flowers, three-quarters inch in diameter, quilled petals, perfectly formed. A remarkable feature is its delightful fragrance, reminding one of Lily of the Valley. Price, 15 cts. each, \$1.50 per doz.

Price, 40c. each, \$4.00 per doz., except where noted. Set of 19 new and rare sorts for \$7.00.

THE FINEST TYPES OF JAPANESE VARIETIES

The following list represents the finest type of the Japanese Chrysanthemum, the results of high breeding by experts in all parts of the world. Gradually the Japanese type has asserted itself in this flower until it has almost submerged the others. From Japan have been brought the finest varieties grown there, the results of centuries of work, and their bloodto use the term-flows in the veins of these.

Henry Barnes. An exceptionally deep but vivid crimson, showing a rich golden reverse of the petals just enough to intensify the crimson but not to nullify it. The form is loosely incurved; broad and massive petals. A grand variety for exhibitions.

Ethelyn. A splendid globular variety with loosely incurved petals, so that the style of the flower is graceful for a rather compact type. The coloring is exquisite, a soft white with a warm blush pink at the base of the petals; this coloring less or more suffuses the whole flower.

Mrs. D. V. West. A grand Chrysanthemum for all purposes. Pure white, with broad curling florets which twist into very graceful lines. It is altogether unique in form and is one of the largest sorts grown. A gem, and should be grown by every lover grown. A gem, and shor of the "Autumn Queen."

Goldmine. Appropriately named as to color, for it is a mine of pure golden yellow. Large flowers with broad petals which are recurved and are festooned

in the most graceful manner. A fine grower and splendid variety for every purpose.

W. Duckham. A Japanese incurved pink; undoubtedly the grandest pink ever sent out; won the C. S. A. silver cup for best ten flowers of any variety. Is the finest keeper known; holds its color; does not

the finest keeper known; holds its color; does not damp a petal; splendid grower and develops grandly from any bud after August 5th. It makes an ideal plant for G-inch pots and will undoubtedly hold first place for years to come.

Millicent Richardson. A rare color in Chrysanthemums and very attractive. It is best described as rosy violet with a silvery sheen on the back of the petals; this sometimes shows at the edges, giving a charming effect. It is a massive but graceful Japanese recurved flower.

Price for the above, 30 cts. each, \$3.00 perdoz. Collection of six for \$1.50.

THE GREAT PRIZE WINNERS

F. A. Cobbold. Large, handsome, reflexing flower, good pink color; magnificent foliage. First bud after August 15th. First bud

Leila Filkins. A beautiful soft pink; clean, thrifty grower; a greatly improved V.-Morel, with none of the difficulties of culture that it presents. Any bud after August 15th.

Maynell. Incurving crimson; splendid grower; stands feeding well. Buds from August 25th onward.

S. T. Wright. The king of the crimsons. Mr. Pockett's very best, without a doubt. Crown bud late in August.

Donald McLeod. Color, yellow ground, heavily striped and shaded crimson. Crown bud end of August.

Harrison Dick. A red and yellow combination; a fine dwarf, sturdy grower. Bud August 20th onward.

Cheltoni. A yellow sport from Nellie Pockett; one of the finest exhibition varieties known.

Miss Mildred Ware. An immense flower, deep rosy cerise. Good habit. Crown bud middle of August onward.

Ben Wells. Grand flower, 10 inches across, tremendous grower. Color, a very delicate flesh. Take bud end of August.

Mrs. F. W. Vallis. An immense crimson, shaded apricot yellow; reflexing florets, petals hang down 10 inches in length. Plant early. Crown bud August 10th onward.

General Hutton. Yellow, shaded bronzy red; vig-orous grower; enormous 10-inch flower. Guard petals an inch wide. Indispensable for the exhibitor. Bud August 15th onward.

Mme. Cahuzac. An immense yellow, lightly shaded bronze. One of the best of the French varieties. Crown bud end of August.

Price, 20 cts. each. Set of twelve for \$2.00.

NEW LARGE EARLY TIES VARIE-

A new strain from European growers, blooming by October 15th, and bearing flowers as large as most later sorts.

Baron Chiseul. A good red of fine incurving form. Japanese. Very usual for this date, October 15th.

Carrie. Deep yellow, dandelion shade, blooms in September. A splendid variety for pots or outdoor planting.

Choulet. A superb, tawny orange; petals reflexed so that the color is shown at its best. A splendid C. Choulet.

Clementine Tousset. An enormous early white, cer-tificated on October 8th. A glistening white, lasts splendidly when cut.

Etienne Bonnefond. Golden yellow, shaded red; Japanese incurved; very broad claw petals, forming a globe.

Goacher's Crimson. Bright crimson, 5 inches across; extremely popular in England; best in bush form. Flowers last into November. 2½ feet. Mid-September and later. Earliest bud.

Mile. Marthe Morel. A beautiful blush pink, similar to the V.-Morel in form. Fine for such an early bloom.

Mme. Paul Sahut. Pure white, incurving form. It opens blush in the center, but becomes pure white as it takes form.

Reveil de Belges. A big, incurving golden yellow, in perfection October 15th. A splendid cut flower variety, fine stem and foliage.

Roi d'Italie. Somewhat later than the others; a splendid large flower, compact, incurving; a rich shade of yellow.

Price, 20 cts. each. Set of ten "Large Early" for \$1.50.

GENERAL COLLECTION OF CHRYSANTHEMUMS

Timothy Eaton. This is unquestionably the largest white incurved variety yet offered. Form perfect, with stout, stiff stems and healthy foliage.

Viviand-Morel. Extra large flowers; petals long and loosely arranged; a beautiful light shade of pink.

Golden Wedding. Of a rich golden yellow color, intense and dazzling. Flowers 10 to 12 inches in diameter, 4 to 6 inches in depth; petals broad and long, double to the center without an eye.

Major Bonnaffon. Grand incurved yellow of largest

Maud Dean, Extra large flowered variety; petals broad and incurving; color pink, almost rose, an color pink, almost rose, an unusual shade.

Mrs. R. M. McArthur. Magnificent clear snow white, solid; petals incurved and cupped, hemispherical in

Philadelphia. An immense incurved flower, opening yellow, but changing to white with yellow at the Intensity. Bright velvety crimson; a fine clear brilliant color.

Col. D. Appleton. A very large, bright, deep yellow, incurved; of fine finish and form; one of the very best.

Pink Ivory. Shell pink; formed like Ivory. Polly Rose. A fine white; of large size; one of the most desirable.

OSTRICH PLUME CHRYSAN-THEMUMS

The three varieties offered below are the most distinct of the Ostrich Plume, or hairy sorts.

Louis Boehmer. An exquisite shade of silvery pink, with deep rose on the inside of the petals.

F. J. Taggart. Light yellow, very double; the feathery growth is very pronounced, a grand variety and a great acquisition to this interesting class.

Eiderdown. Large, perfectly double, incurved; snow white, covered with glandular hairs; stiff stems.

20c. each, \$2.00 per doz. Set of 3 for 50 cts.

The following sorts are those we consider the best for cutting from early flowering to the latest:

DAHLIAS

CACTUS DAHLIAS

At the present time this form is the most popular of all the Dahlias, as it combines the grace and beauty of the single forms and is less formal in outline than the double varieties.

Austin Cannell. Deep crimson rose.

Countess of Lonsdale. Beautiful salmon pink; large and full to the center. A very profuse bloomer.

Cycle. Bright rosy crimson; an early and profuse bloomer.

Delicata. A beautiful true Cactus variety. Light salmon at base of petals shading to a delicate pink.

Earl of Pembroke. Bright plum; petals long and pointed; regular form and finish.

E. O. Greening. Purplish crimson red flowers, long pointed petals.

Very deep salmon; perfect shaped flowers.

G. W. Childs. Shining black; petals edged with purple; free blooming; good for cut flowers.

Geisheler. A pleasing shade of rosy crimson, occasionally striped white. A charming variety.

Genista. Yellow changing to golden yellow. Beautiful form and strong long stems.

Gloriosa. Vivid carmine crimson; extremely beautiful. Green's White. Pure white.

Henry Stredwick. Rich velvety maroon; petals long and narrow. An exquisite flower,

Hohenzollern. A rich bronzy orange red color with golden sheen; fine.

Henry F. Michell. Acknowledged to be one of the noblest. Of immense size and irregular form; petals long, broad and twisted. Colors range from soft yellow to deep orange red. A beautiful variety, the shades and tints blending with perfect harmony

Imperator. Robin red color with chestnut; beautiful form.

I. W. Wilkinson. Carmine rose petals shaded scarlet in the center.

John H. Roach. A fine light yellow, of perfect form; long, incurved pointed petals. A beautiful flower and always full to the center.

Lodestone. Apricot color.

Loreley. Soft La France pink, shaded lighter toward the center, which is a creamy white.

Lyric. Yellow green, changing to a bronze red; fine.

Madame Medora Henson. Large and fine; clear cherry red petals. This variety produces more flowers than any other Cactus Dahlia.

Miss A. Nightingale. Deep yellow heavily tipped bright red.

Mrs. Winstanley. Yellow petals, edged scarlet red; large flowers; free bloomer.

Nibulunger. Entirely distinct; pleasing shade of red overlaid blue. Finely quilled petals.

Primrose Dame. Light yellow.

Red Rover. Scarlet red.

Sailor Prince. Bright crimson red; long petals verfect form.

Siegfried. Ivory white.

Sonnenstrahlen. Canary yellow.

Standard Bearer. Fiery red; very free flowering.
Starfish. Petals suggestive of porcupine quills; pure coral red; extra fine.

Strahlein Krone. Intense cardinal red; very beautiful.

True Friend. Dark crimson red.

25 cents each, \$2.50 per doz., \$18 per 100.

NEW AND RARE CACTUS DAHLIAS

Arachne. Has peculiar twisted and curled petals, forming a curious irregularly built flower, and on account of this unique form is well named Arachne, meaning "spider." The petals are creamy white edged with a broad band of crimson. The coloring, however, varies as much as the form, there rarely being two flowers alike.

Capstan. Soft brick red, shaded apricot. Remarkable for its free and early flowering.

Emperor. Pure plum color, very velvety; the base of each petal yellow; the stems are long and it is very free flowering.

Galliard. Flowers intense fiery scarlet; artistic new variety.

Island Queen. Soft lavender pink, a popular and beautiful shade; flowers of medium size and fine Cactus form. A good late bloomer.

Kriemhilde. Brilliant pink with white center.

Loyalty. Elegant bright coral red flowers.

Mary Service. Light orange scarlet gradually shading to deep rose on the tips of the petals.

Mrs. Carter Page. Soft carmine red, faintly tinged yellow at the base.

Progenitor. A unique break in form, each fluted petal being furcated at the end like a staghorn fern and forming several points; bright crimson lake.

Uncle Tom. A great improvement on Night, with longer and more pointed petals; exceedingly dark in color, being black brown; very distinct.

Price of any of the above varieties, 35 cents each, \$3.50 per doz.

DAHLIAS, DECORATIVE OR SHOW

Arabella. Sulphur, tipped pink.

Caroline Gininnii. Bright crimson.

Henry Patrick. Large pure white; long stems.

John Elitch. Dark rich maroon.

John Kynes. Golden yellow tipped scarlet.

Keystone. Pink striped crimson.

Le Phar. Orange scarlet.

Maid of Kent. Crimson and white mottled.

Mme. Zeller. Yellow edged pink.

Mrs. Bennett. Soft crimson.

Mrs. Geo. Reid. Pure white conspicuously edged with rose.

Mrs. Stancombe. Straw suffused amber, striped red, mottled and tipped blush.

Orange King. Flowers rich orange and a profuse bloomer,

Psyche. Pale primrose shaded rose; a dwarf branching plant and one of the most profuse bloomers.

Wm. Agnew. Dazzling rich scarlet.

Price of any of the above varieties, 15 cents each, \$1.50 per doz.

DAHLIAS, POMPON

Allie Mourey. A very pretty Pompon, of fine form and good habit. Small, compact flowers, pinkish white tipped deep pink.

Canary. The finest pure yellow Pompon variety, always full to the center, and a very profuse bloomer.

Catherine. A fine pure yellow of good form; full to the center and borne on long stems.

Eleganta. Soft pink tipped deep pink.

Little Prince. Red tipped pinkish white; sometimes mottled deep crimson and shaded maroon.

Any of the above, 15 cents each, \$1.50 per doz.

TYPE OF DECORATIVE DAHLIA

DAHLIAS, QUILLED

A. D. Livoni. Seashell pink.

Apple Blossom. Nearly all the colors of the apple blossom.

C. W. Bruton. Canary yellow flowers of immense size.

Electric. Brilliant magenta.

Grand Duke Alexis. Flowers large creamy white tipped lilac.

M. D. Hallock. Clear yellow: early.

Mrs. Dexter. Rich salmon.

Nymphæa. White and shell pink.

Prince Charming. Flowers white suffused purple pink.

Price of any of the above varieties, 20 cents each, \$2 per doz.

DAHLIAS, SINGLE

C. E. Varnum. Very large red flower tipped lighter. Fashion. Crimson maroon.

Isaac Pitman. Fine large purple.

Leher Cark Sache. Bright rosy lavender,

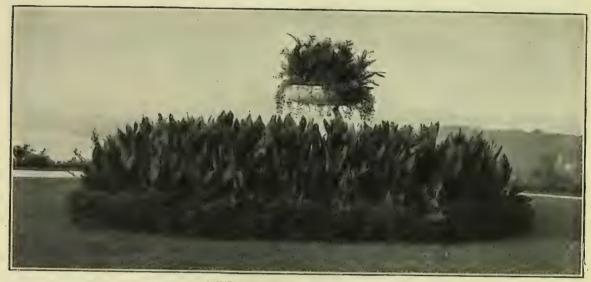

Snow Queen. Pure white.

Price of any of the above varieties, 15 cents each, \$1.50 per doz.

The Largest Horticultural Establishment in America.

NEW AND RARE FRENCH CANNAS

The advent of the French or Crozy race of Cannas, so named in honor of the originator, M. Crozy, revolutionized the floral decoration of American gardens. A comparatively obscure race of plants has risen to the front rank because of its vastly improved character in flower and foliage. France, Italy and America have vied for premier honors in improving the race. There are probably over five hundred sorts in cultivation and the varieties in our list are selected from that great number. They represent the highest types and the best contrasting colors. The height to which these Cannas usually grow, except where stated in description, is four to five feet, according to season and soil. The foliage of all is green

A WELL DESIGNED BED OF CANNAS

Alsace. Delicate sulphur yellow, changing to a creamy white without spots. Very free flowering, medium height. Λ grand variety for massing.

America. The foliage is bronze color, with dark red hues and metallic luster. The flowers are enormous, beautiful, glowing purplish red, flamed and striped.

Beaute Poitevine. A very fine dark crimson variety with dark metallic green foliage and deep rich crimson flowers. A prolific bloomer.

Black Prince. Intense dark yelvety maroon; grows strong and erect, 3 to 4 feet; fine dark red stems and deep green leaves edged with purple.

Buttercup. Intensely bright yellow, as lustrous and bright as the "buttercup" of our fields. Best in its color. Height, 3 feet.

Cinnabar. Cinnabar red, distinctly edged with golden yellow; a fine round flower of great substance held well above the foliage.

Defender. Clear rich yellow striped with bright scarlet; 3 to 3½ feet high. This is the best of the spotted varieties.

Directeur Potier. A stately very free blooming variety. Foliage deep green and abundant. Flowers light orange, brilliant yellow edge flamed yellow at throat.

Duke of Marlborough. This is decidedly the darkest and richest colored Canna in existence. The flowers are a deep rich crimson maroon.

Gladiator. A rugged, strong growing variety which withstands our Summer storms better than almost any other Canna. The flowers are bright yellow thickly spotted with crimson and bloom profusely. Heads are unusually large and borne on long, strong stalks with tough, deep green foliage. A superb variety alone or in masses.

Gloriosa. Color bright rich crimson, with wide border of deep golden yellow. One of the most showy varieties. Height, 3 feet.

Luray. Large well formed flowers of a very attractive rosy pink.

Martha Washington. The flowers are very large and frequently have five broad petals; the trusses are immense and the color pure bright rose. Height, 2½ to 3 feet.

Mrs. Kate Gray. Flowers a rich shade of orange scarlet, marbled with intense coppery red; yellow in the throat. They measure from 6 to 7 inches across, individual petals often being over 2 inches wide. Height, 6 feet.

Mrs. C. W. Ward. Color a brilliant crimson scarlet. Flowers very large, sometimes almost semi-double, and borne in large spikes. The habit is dwarf and compact; flower trusses stand well above the foliage.

Olifant. Foliage deep green. Flowers rich golden yellow, lightly speckled with brownish red. They are very large and broad and are produced in abundance. Height, 2½ feet.

Olympia. Very free bloomer, bears large trusses, always erect and stands the sun a long time. The color is a violet purple shaded with crimson.

Orange Queen. The color is very distinct, being a true burnt orange. It is handsome in foliage and habit; blooms most profusely. Height, 3 feet.

Papa Canna. Considered by many the finest red; certainly a grand addition to this color. It grows about 3 feet high; has immense spikes of flowers, the florets being of grand size and fine form; color pure red; habit of plant graceful with wavy light green foliage.

P. J. Berckmans. A grand, robust growing Canna, large, deep green foliage, flowers a rich shade of carmine crimson, soft and yet brilliant; broad, strong petals.

Pennsylvania. The flowers are often 7 to 8 inches across, with petals 2½ inches broad. It will produce double the number of flowers of any other of the giant flowering Cannas. Height, 6 feet.

Pres. McKinley. Brilliant crimson with scarlet shading. Dwarf habit, growing only 2½ to 3 feet.

Queen Charlotte. A grand Canna, with a distinct golden belt around each petal, the center brilliant orange scarlet, with crimson tones.

Sir Trevor Lawrence. Soft carmine rose, changing to delicate rosy pink. Around the entire flower, but broader at the ends, is a border of bright yellow.

Souv. d'Antoine Crozy. Intense scarlet, rich and dazzling, rich golden yellow edge; does not fade or scorch in the hot weather. The most brilliant Canna in existence.

Price, dormant roots, up to April 1, 15 cts. each, \$1.50 per doz.; growing plants, after April 1, 25 cts. each, \$2.50 per doz.

CARNATIONS

The Carnations we offer are strong, young plants out of 2-inch pots. If planted out in Spring they should begin blooming about July or earlier. If potted in the Fall they should bloom profusely during the Winter months.

Robert Craig. Perfection is more nearly attained in this peerless variety than in any other scarlet yet introduced. The flowers are of the largest size, perfect form, fragrant, and borne on long, stiff stems. The growth is splendid, healthy and vigorous. An early and continuous bloomer. 30 cts. each, \$3.00 per doz.

Harlowarden. The best rich crimson Carnation on the market. Splendid color, long stems, large flowers and a very healthy grower; very productive. 15 cts. each, \$1.50 per doz.

Gov. Wolcott. A grand white Carnation which gives every evidence of becoming a standard in its color. The flowers are pure white, measuring 3 to 3½ inches across; long, strong stems and splendid foli-age. It is very healthy and vigorous, being immune against most carnation diseases. 15 cts. each, \$1.50

Mrs. M. A. Patten. Another new Carnation of the highest merit. The flowers are very large, borne on extra long stems. They are a glistening white, striped and penciled with bright red. Decidedly the best striped Carnation. 15 cts. each, \$1.50 per doz.

STANDARD NAMED CAR-**NATIONS**

Adonis. The ideal scarlet.

Daheim. Brilliant crimson, shaded maroon.

Dorothy. A fine clear deep pink.

El Dorado. Canary yellow, tipped rosy carmine. El Dorado. Rich yellow, striped and penciled bright

Enchantress. A superb shade of rosy blush pink. Flamingo. A grand carnation; deep crimson scarlet.

Genevieve Lord. A beautiful

light pink.

Gen. Maceo. One of the darkest and richest colored.

Golden Nugget. Clear deep yellow, slightly marked with red.
Gov. Roosevelt. Rich brilliant

scarlet.

Harry Fenn. A deep crimson. A gem in its color.

J. H. Manley. Brilliant orange scarlet. Very fragrant.

scarlet. Very fragram. Jessica.

lian Pond. A fine white, with flowers 3½ inches in di-Lillian ameter.

Morning Glory. Delicate pale pink.

Mrs. Franz Joost. A very valuable variety, highly esteemed for its free flowering qualities. Color, beautiful rich salmon pink.

Mrs. Thomas W. Lawson. Pure brilliant rose pink.

My Maryland. Large flower,

pure white.

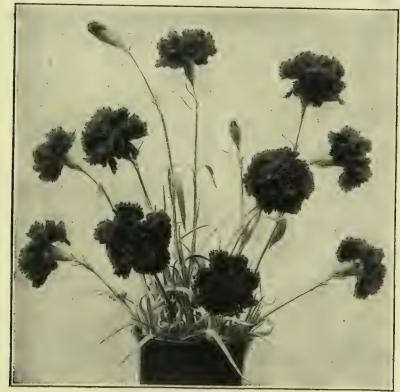

Prosperity. White, irregularly overlaid, rosy pink.

Queen Louise. Clear, snowy white, large flowers.

Red Lawson. A sport from Mrs. Thos. W. Lawson; much deeper in color but identical in other respects.

Victory. Grand brilliant scarlet. Wm. Scott. Large flowers, deep pink; long stem.

Price, 10 cts. each, \$1.00 per doz., \$6.00 per 100.

A VASE OF CARNATION ROBERT CRAIG

GLADIOLUS BULBS

This yery popular family contains innumerable varieties and comprises every imaginable shade of color from the most gorgeous and dazzling to the most fascinating and delicate tints. They are invaluable for garden ornamentation and for the house, as they are extremely durable and lasting.

Professor Lombin. Lilac violet.

A. R. Smith. Large flower, carmine, orange; brilliant. Above varieties, 50 cents each, \$3 per collection, one of each variety; \$30 per 100.

LEMOINE'S HYBRIDS. Very, beautiful, remarkable for fine colorings and markings and distinctive form; extra fine sorts. 35 cts. doz., \$2.50 per 100.

La Bien Aimee. 25 cents each, \$2.50 per doz. Lord Salisbury. Orange flowered. 35 cents each,

\$3.50 per doz. General Gordon. Bright deep scarlet. 25 cents each, \$2.50 per doz.

Marie, 10 cents each. \$1 per doz. Queen Victoria. 15 cents each, \$1.50 per doz. Superfine. Mixed. \$3.50 per 100.

Pink Shades. 35 cents per doz., \$2 per 100. Scarlet and Crimson. Extra choice. 30 cents per

doz., \$1.75 per 100.

Snow White. When first opening, frequently show a tinge of purple in the throat, but if cut then and put in water, will open fully and of purest snow white, every flower opening to the tip. 20 cents each, \$2 per doz.

White and Light. 35 cents per doz., \$3 per 100.

Yellow. 50 cents per doz., \$3 per 100.

RAMOSUS. A dwarf growing variety. 50 cents per doz., \$3 per 100.

The following collection was personally selected by us in Europe. Many of them are rare and scarce.

Ami Berat. Perfect form, fine spikes; bright clear red slightly suffused with purple. 25 cents. slightly suffused with purple. 25 cents.

Baroness Burdett-Coutts. Magnificent spikes of

flowers, rose shaded lilac; unusually large. 30 cents. Belisaire. Deep rose, delicately striped salmon. 25 cts.

Depute Berteaux. Bright red, dark velvety flamed crimson, blotched with white shaded with purple. 50 cents

Directeur Barnsby. Very large flowers of deep rose. striped with mauve, dark on the edge of petals, spotted white. 50 cents.

pocteur Darses. Long spike of large flowers, brilliant, clear red, rich, velvety, marbled with clear white. 20 cents.

Docteur Fieret. Large bright red flowers spotted with Naples yellow. 20 cents.

Elegant. A grand spike of flowers; bright rose lined the property of th

with white, striped carmine, spotted red and shaded vellow. 50 cents.

Enchanteresse. A superb, compact spike, with enormous finely opened flowers of pale satiny lilac, with delicate violet lines on some of the petals. 50 cents.

BEDDING PLANTS

Including Summer Flowering Bulbs and Tubers

T would be useless to offer for Summer bedding plants which cannot endure, by turns, flerce heat and drouth and deluges of rain. Popular bedders must grow thriftily and bloom profusely and continually, or keep their foliage bright, despite all such hardships; and, moreover, must content themselves with but a moderate amount of care. We offer only the brightest and sturdiest of the class including the best Summer Blooming Bulbs and Tubers, Foliage and Flowering Plants.

Prices range from \$1 to \$3 per doz. and from \$6 to \$20 per hundred

ACALYPHAS. The foliage of all sorts of Acalyphas is handsomely blotched and marked; A. torta has leaves beautifully cut and curiously twisted. All the best bedding varieties, \$2 doz., \$12 per 100.

ACHYRANTHES. We offer all the best varieties of this section of bright-leaved bedders at \$1 per door.

this section of bright-leaved bedders at \$1 per dozen, \$6 per 100.

AGERATUMS. On account of their free-flowering qualities and their large fluffy clusters of bloom of all shades of blue and also pure white, the Ageratums have become quite popular as bedders. All the best varieties, \$1 per dozen, \$6 per 100.

ALTERNANTHERAS. These are dwarfer and more compact in habit, with smaller leaves than the majority of foliage plants for bedding. They are very brightly colored and especially adapted for working out designs, letters, etc. \$1 per dozen, \$6 per 100.

BEGONIAS, Lemoine's Hybrids. This is a new class, especially bred for bedding. 50 cents to

class, especially bred for bedding. 50 cents to

BEGONIAS, Tuberous. As a bedding plant the Tuberous Begonia seems to eclipse all the old favor-We now have species that, with good culture, endure the hottest suns and produce rich and brilliant effects. For varieties and descriptions, see Bulbs and Tubers.

CALADIUM esculentum. The well known bedder, with immense tropical plain green leaves, \$1 to \$3 per dozen; \$6 to \$20 per 100, according to size of

CENTAUREAS. (Dusty Miller). The silvery white leaves of these plants contrast finely with those of dark colored sorts. Some of them are finely cut and fernlike. \$1 per dozen, \$6 per 100.

BEDDING COLEUS

COLEUS. Of these standard bedding foliage plants we keep all the best varieties. Their brilliant leaves render them as valuable for Winter house decoration as for Summer bedding. \$1 per dozen, per 100.

ECHEVERIAS. The thick, fleshy leaves of the House Leeks form dense rosettes that are very effective in bedding. \$1.50 per dozen; \$10 per 100.

FUCHSIAS. For bedding in shaded places, covering unsightly angles and corners, or for flowering on porches and verandas, Fuchsias are the perfection of grace and exceedingly pretty. 20 cents each; \$2 per dozen.

GERANIUMS. We keep in stock a fine assortment of the best double and single forms of these popular old plants. They have not been overlooked in the general plant evolution, as many excellent new sorts will show. 15 cents each, \$1.25 per dozen, \$10 to \$15 per 100.

HELIOTROPE. For bedding and pot culture these fragrant heat loving plants are alike indispensable. Their flower trusses now show many shades of color from pure white through lavender and pinkish violet to rich deep purple, and some have golden variegated leaves. All the best varieties, 15 cents

each, \$1.50 per dozen.

LANTANAS. These bedders are bright with bloom the entire season, very pretty, and require little care. All the best colors, 10 to 15 cents each; \$1 per dozen.

LOBELIAS. The blue and scarlet Lobelias are brilliant and free flowering; unsurpassed for bedding, edgings, baskets and vases. \$1 per dozen, \$6 per 100.

MARGUERITES. Paris Daisy—The Frenchman's. POLIANTHES tuberosa. This, the well known Tuberose, is one of the best of our Summer bulbs.

Single Tuberose. The "Orange-Flowered" variety. 10 cents each, \$1 per dozen.

Excelsior Pearl. The finest strain of the double varieties, and a beautiful flower; of dwarf habit. 10 cents each, \$1 per dozen.

SALVIAS. These are among our very best plants for Summer display. Their habit is very compact and graceful and the flowers are of various colors: pure white, blue, white with scarlet spots, and in red from all deep, dark shades to bright scarlet. 10 cents each, \$1 per dozen, \$8 per 100.

TIGRIDIAS. (Ferraria.) Splendid Summer blooming bulbs; the flowers are showy and freely pro-

T. conchiflora. Dark yellow flowers. 5 cents each, 50 cents per dozen.

T. grandiflora alba. White flowers. 10 cents each, \$1 per dozen.

T. grandiflora rosea. A beautiful new and rare variety, with flowers of lilac rose. 60 cents per doz., \$5 per 100.

T. pavonia. Scarlet. 5 cents each, 50 cents per doz. TROPÆOLUMS. We have no more brilliant flower than this for any purpose. Quick growing, free flowering and having marked individuality in both leaf and flower, it is par excellence as a bedding plant, or for growing in baskets, vases, etc. All the best species and varieties 10 cents each, \$1 per dozen, \$6 per 100.

variegatum. A new and valuable plant. Has finely marked white and green leaves like those of a Silver Geranium, and is excellent for ribbon T. variegatum. work. 50 cents each.

VERBENAS. These are elegant bedding plants, with shapely trusses of flowers in every shade of every color except yellow. The large flowering strain, V. hybrida grandiflora, now supersedes all others. 10 cents each, \$1 per dozen, \$6 per 100.

AQUATIC PLANTS

LANTS which grow in or near the water are receiving much attention now, and they are well worthy of it, for some of the most beautiful of all our flowers are aquatic in their nature. The exquisite Water Lilies, the stately Lotus, the wonderful Victoria regia, serve with others to distinguish this class. It is not at all difficult, in reality, to provide for them the necessary conditions. In a modest way the hardy Water Lilies can be enjoyed growing in an ordinary tub, with a minimum of attention; or a brick tank of any desired dimensions, in which all the fine aquatics will flourish, can be readily constructed and lined with cement. If contiguous to a greenhouse, so that a section of the tank can be warmed by a hot water or steam pipe, the great Victoria regia can be flowered. We will construct and arrange aquatic tanks anywhere desired.

A POND OF HARDY WATER LILIES AND BAMBOOS AND GRASSES, WITH BEAUTIFUL SURROUNDINGS

- ACORUS. Fine decorative plants for borders of ponds or shallow water; they are hardy and have pretty flowers.
- A. calamus. The root is the well known Calamus or Sweet Flag; yellow flowers. 25 cents.
- A. graminifolius variegatus. A pretty variety, with white striped leaves. 25 cents.
- A. Japonicus var. Variegated foliage; fine. 50 cts.
- **APONOGETON** distachyon. The "Water Hawthorn." Pure white and fragrant flowers, suitable for indoor and outdoor culture, being hardy; the leaves are also pretty. 50 cents.
- **ASPIDISTRA lurida var.** This plant is good everywhere and will grow freely on the margins of ponds or small streams. Few plants of value are so available for all decorative uses. 50 cents to \$2.
- BUTOMUS umbellatus. The "Floating Rush."
 Fine, large pink flowers; one of the best hardy swamp plants. 25 cents.

- CALLA palustris. A pretty little hardy aquatic, growing in swamps or shallow ponds. 25 cents.
- C. Æthiopica (Richardia). The Calla Lily. 25 cts.
- C. albo-maculata (Richardia). The Spotted Calla. 25 cents.
- **CALTHA palustris monstrosa plena.** Λ fine hardy plant, bearing large golden double flowers. 25 cts.
- CERATOPTERIS thalictroides. The "Floating Staghorn Fern." A very curious hothouse aquatic Fern of much interest. 75 cents to \$1.
- **CYPERUS alternifolius.** The "Umbrella Plant." Useful for swampy places, and also for aquariums. 25 cents.
- C. alternifolius var. 75 cents.
- EURYALE Amazonica. A noble Water Lily, with very large, thorny leaves and large and beautiful pink flowers. \$3.
- E. ferox. Like the foregoing, but the flowers are deep violet. \$3.

HIBISCUS. Of this extensive genus there are sev-
eral species which do well planted on borders of
pands of Miles to well planted on borders of
ponds, etc. They have beautiful foliage and at-
tractive white, rosy and crimson flowers.

- J. effusus aureo-straitus. Striped leaves, curiously
- twisted; very distinct plant. 50 cents.
- J. zebrinus (Scirpus). A fine variegated plant. 50 cents.
- LIMNOCHARIS Humboldtii (Plumieri). The pale yellow miniature Water Lily; a pretty stove aquatic. 50 cents.
- LIMNANTHEMUM (Villarsia) nymphæoides. A pretty little hardy aquatic with yellow flowers and leaves somewhat like those of the Water Lily. 35 cents.
- NELUMBIUM. Superb aquatic plants growing to considerable height above the surface of the water. Their flowers and foliage are both of great beauty and their habit makes them valuable for planting in backgrounds.
- N. luteum. The American yellow flowered Lotus; a splendid hardy plant, bearing large and fragrant yellow flowers resembling Double Tulips; the leaves are large and of a peculiar bluish green. Very ornamental for aquarium planting or for the borders of small lakes or ponds. \$1.
- N. speciosum. The Water Lily of Hindoostan; the Egyptian Lotus Bean of Pythagoras. A magnificent aquatic, bearing immense double flowers of white and rose color, richly fragrant and very beautiful. They are held up on long stems above the very large umbrella-like leaves and the unopened buds are of elegant appearance. The flowers are followed by an odd seed-pod, resembling closely the rose of a watering pot, holes and all. This superb plant is one to delight any flower lover, and, although not hardy, may be readily flowered outside in the Summer, in a tank or pond.
- VILLARSIA nymphæoides. See Limnanthemum. 50 cents.

TENDER NYMPHAEAS

These should be grown in tubs or boxes sunk below the surface. For the Winter, after the foliage has died off, remove them to a cellar or under a greenhouse bench, and keep them moist. * Night bloomers.

VICTORIA REGIA

Truly the queen of Water Lilies. A magnificent and remarkable giant aquatic plant, needing a high temperature to develop its flowers, which are a foot or more in diameter, and very beautiful. The leaves are also enormous, being four to six feet in diameter, lying flat on the water, with peculiar turned-up margins. These gigantic leaves are sufficiently buoyant on the water to support the weight of a child of eight or ten years. This grand plant may be flowered outdoors in Summer by anyone who can provide a tank in which the water can be kept at SO or S5 degrees. Plants, \$5; seeds, 25 cents each.

Special collections of the best and most distinct Aquatics, suited to either large or small ponds, made up at special rates.

We also carry a large stock of Hardy Varieties. List and prices on application.

(For Hardy Aquatics see Nursery Catalogue.)

The Largest Horticultural Establishment in America.

BULBS FOR WINTER BLOOMING

LILIUMS

No herbaceous border, shrubbery border, or wild garden, is complete without a liberal representation of these most graceful and charming flowers. For chasteness and beauty of color and magnificence of form the Lilium stands pre-eminent. Contrary to general expression, they are of the easiest culture and will thrive and bloom in almost any situation except dense shade. They are equally decorative and attractive as cut flowers for the house. In view of the rising popularity and increasing demand for these beautiful plants we have imported from all parts of the world varieties of great merit suitable for this climate.

We take pleasure in offering to our patrons the following superb collection, feeling assured that the returns will be more than commensurate with investment in the whole or any of the varieties.

Many of the kinds we can supply in thousand lots for mass planting. We shall be pleased to quote special prices to customers desiring to purchase in large quantities.

- Lily). Appropriately called the queen of Lilies. Of all Lilies this is undoubtedly one of the finest, whether we regard its size, sweetness or its exquisite arrangement of color. Its large and graceful flowers are composed of six petals of a delicate ivory white color, thickly studded with chocolate crimson spots and striped through the center a golden yellow. From 6 to 20 flowers are produced on a stem, and as the bulbs acquire age and strength the flowers increase in size and number. Good bulbs, 8 to 9 inches in circumference, 10 cents each, \$1 per doz., \$7 per 100; fine bulbs, 9 to 11 inches in circumference, 15 cents each, \$1.50 per dozen, \$10 per 100; selected bulbs, 11 to 13 inches in circumference, 25 cents each, \$2.50 per dozen, \$15 per 100.
- L. CANDIDUM (Madonna Lily).

 An old favorite; flowers are pure white and very fragrant. 15 cents each, \$1.50 per doz.
- L. SPECIOSUM (Lancifolium).

The varieties of Lilium speciosum comprise the most important group of any one species. They are of easy growth and can always be relied upon to give satisfaction. The flowers are very beautiful, showy and distinct and exquisitely fragrant. Magnificent as border plants. They are also excellent for pot culture.

- **L. speciosum album.** Large white flower of great substance, with a greenish band running through the center of each petal. Fine bulbs. 15 cents each, \$1.50 per dozen; extra large bulbs, 20 cents each, \$2 per dozen.
- L. speciosum album Kraetzeri. One of the finest Lilies in cultivation, having white flowers, with dark orange colored anthers. 35 cents each, \$3.50 per doz.
- **L. speciosum Melpomene.** Very large flowers, rich blood crimson, heavily spotted. 15 cents each, \$1.50 per doz.
- **L. speciosum roseum.** White, shaded and spotted with rose. Fine bulbs, 15 cents each, \$1.50 per doz.; extra large bulbs, 20 cents, \$2 per doz.

LILIUM AURATUM

- L. speciosum rubrum. White, heavily spotted with rich crimson spots. Fine bulbs. 15 cents each, \$1.50 per doz.; extra large bulbs, 20 cents each, \$2 per dozen.
- L. speciosum Schrymakersii. Early and free flowering variety, producing many deep rose colored flowers spotted with purple. 25 cents each, \$2.50 per doz.
- **L. LONGIFLORUM.** A beautiful well known variety, with snow white trumpet shaped flowers that are very fragrant. Blooms in June and July. First class, 12 cents each; \$1.25 per doz. Extra size, 25 cents each; \$2.00 per doz.

We also carry a large stock of Tulips, Hyacinths, Narcissus and Daffodils, and many other varieties of Liliums. Any customer desirous of procuring a list of these varieties of Bulbs, will, with pleasure, be furnished the same upon application. We also carry these Bulbs in varieties such as are best adapted for outdoor planting or for forcing under glass.

GRAPE VINES AND SMALL FRUITS

For Forcing Under Glass

FOREIGN GRAPE VINES For Hot and Cold Graperies

We make a specialty of Grape Vines for Vineries, and supply fine and healthy two-year-old plants, guaranteed free from disease, of the best selected sorts.

One-year-old vines of any of these varieties may be had at prices one-third less than for two-year old.

Special prices for large quantities will be given on application. All our vines are guaranteed true to name and variety.

We also carry a large stock of 3-year-old Canes. Price on application

Black Barbarossa. Berries round, very large; a very late sort; best suited for hot vin-ery. \$2.

Black Frontignan. Berries below medium size, flesh rich and juicy; a very reliable sort.

Black Hamburg. Berries roundish oval, very large, juicy and rich; the most popular and most reliable sort in cultivation.

most reliable sort in cultivation. \$2.

Black Prince. Berries roundish
oval, juicy and rich; bunches
long and tapering; best for
cold vineries. \$2.

Black St. Peter. Black. Very
fine dark variety, good free
grower; best for hot vinery. \$2.

Canon Hall Muscat. Berries
very large, roundish oval; juicy
and rich; best for hot vinery.
\$2.

Calabrian Raisin. Berries large,

round and juicy; a first class white grape; late. \$2.

Chasselas de Fontainebleau.

Berries round and large, very juicy and sweet; a good sort for cold vinery. \$2.

Duchess of Buccleugh. Berries round and golden; good beaver:

round and golden; good bearer; a very excellent grape. \$2. blden Queen (Pearson's White). Bunch large and well Golden shouldered; berries large and wen shouldered; berries large, ob-long; said to be the best late keeping white grape in culti-vation; of strong and vigorous habit. \$2.

Gros Colman. Berries round and extra large, of peculiar flavor; very large bunches of

flavor; very large bunches of vigorous habit; a very handsome grape. \$2.

Gros Maroc. Berries large, ovate, dark plum color; flesh firm and juicy; bunches medium, and set freely. \$2.

Lady Downes' Seedling. Black. Large and handsome berries, above medium size; bunch medium, long, tapering, always well set; flesh firm, sweet and richly flavored; a good keeper and one of the best late sorts. \$2.

best late sorts. \$2.

Mrs. Pince (Black Muscat). Bunch large and tapering, well shouldered and handsome; berries me-

pering, well shouldered and handsome; berries medium and oval; flesh firm, rich and sweet, with true Muscat flavor; a late grape, and an excellent keeper; best for hot vinery. \$2.

Muscat Hamburg or Black Muscat. Berries very large, roundish oval; flesh melting, juicy and rich; a most delicious grape, with a distinct Muscat flavor; a valuable midseason variety; best suited for hot vinery. \$2. for hot vinery. \$2.

Muscat of Alexandria. Greenripened. Bunches large and shouldered, long tapered; berries large and oval; flesh firm, rich and sugary, with a delicious Muscat flavor; very prolific and requires high temperature; a very valuable and perature; a very valuable and well known grape, ripening late; best for hot vinery. \$2. Madresfield Court. Black Mus-

cat. Bunch large and well shouldered; berries large, ob-long, with a fine delicate bloom; flesh melting, juicy and rich, with a strong Muscat flavor; a

with a strong Affiscat flavor; a valuable variety, of robust habit. \$2.

Prince Albert. Berries large, in fine bunch; rich, juicy and highly flavored; a very fine grape, and best suited for hot vinery.

vinery. \$2.

Royal Muscadine. Berries round, of a pale amber when ripe; flesh firm, juicy and very pleasant; a very good grape of the Sweet-water type, some-times called White Chasselas; suitable for cold vinery. \$2. Royal Ascot. Bunches large; berries firm, jet black and very

juicy, with a piquant plumlike flavor; best for hot graperies.

Santa Cruz. White: large berries, large bunch; a vigorous grower and a very good sort.

Trentham Black. Berries oval, large, very juicy and rich; a great bearer and a very good sort; best for cold vinery. \$2.

BAY TREES—Laurus Nobilis

(SWEET BAY)

No decorative plant can take the place of the classical Bay Tree, with its thick crown or pyramid of glossy leaves, for outdoor decorations, or for ornamenting halls, stairways, etc. We have a choice stock of these handsome trees, grown both as Standards and Pyramids.

We are the largest growers and importers of Bay Trees in the country, and have constantly on hand a fine assortment of various sizes and shapes. The illustrations on this and the following page show some of our extra-large specimen trees. On next page we quote the following prices on these trees, and shall be pleased to answer inquiries concerning them:

Pyramidal-shaped 5½ feet high, 24 inches in diameter at base, tapering to a point\$10 00 7 feet high, 30 inches in diameter at base, tapering to a point 12 50 8 feet high, 36 inches in diameter at base, in diameter at base,

9 feet high, 45 inches in diameter at base, tapering to a point, 30 00

Stems 45 inches high, crowns 45 inches in diameter..... 22 50

We are the largest dealers in America in large specimen Bay Trees, Pyramidal, Standard or Tree-shaped; and in large specimen Orange Trees, Camellias, Agaves and Oleanders, for the ornamentation of private estates.

The Largest Horticultural Establishment in America.

OUR RUSTIC CONSTRUCTION DEPARTMENT

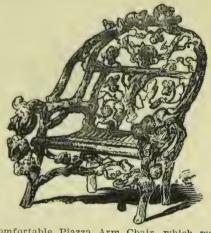

This is one of our leading Departments. We are the originators of many of the beautiful effects obtained in the building of Rustic Summer Homes, Bridges and Pergolas. No estate is complete without rustic effect. There are always hillsides, ravines, or woodland spots where nothing so appropriate can be used. Consultations free of charge.

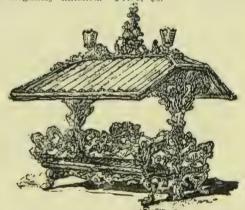

SUMMER HOUSE

SINGLE SUMMER HOUSE, THATCHED STRAW ROOF

A comfortable Piazza Arm Chair, which we make with oval as well as with square backs, and also with rockers. Made of Laurel roots; substantially and elegantly finished. Price, \$8.

A Rustic Pagoda, substantial and handsome. Price, \$75 to \$200.

Settee of fancy pattern, built of Laurel roots and very substantial. Oiled and varnished; four sizes, 4, 5, 6 and 7 feet in length. Price, \$10, \$12, \$15 and \$17.50.

We furnish artistic and massive Rustic Work of all sorts and descriptions. Summer houses, arbors, bridges, bathing and well houses, gateways, lawn pagodas, settees and chairs, tables and rustic stands, vases and tubs—everything needed in this line we can supply in artistic designs and the best red cedar, finely finished. Further information on application.

VASES, TUBS AND POTS

No. 943. World's Columbian Fair Vase⁹ Two sizes

20 inches high, 2 feet in diameter; capacity, 1% bushels, \$10 each.

 $27\frac{1}{2}$ inches in diameter, 23 inches deep; capacity, $2\frac{1}{4}$ bushels. \$14 each.

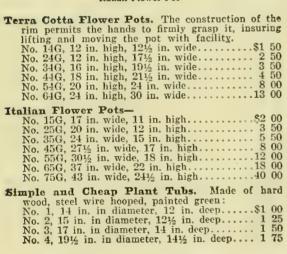

No. 173. In two sizes

29 inches in diameter, 23 inches high; capacity, 3 bushels. \$16 each.

25 inches in diameter, 21 inches high; capacity $1\,\%$ bushels. \$12 each.

Italian Flower Pot

Terra Cotta Flower Pot

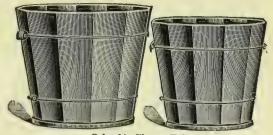

26 inches in diameter, 22 inches high; capacity, 2 bushels. \$13.50 each.

TUBS (Continued.)

Columbia Flower Tubs. These tubs are made from the best cypress lumber, and will last for years without decay. They are held together by two heavy steel wires, which are connected with substantial iron handles, and are so arranged that the wire can be tightened or loosened simply by turning a nut on the handle. They are finished in natural wood, varnished, or we can furnish them painted, but to order only.

We also wish to state that we manufacture Tubs in many other designs and sizes in addition to those herein stated. One of our specialties is Cedar Tubs, either square or round, making them in stands, from one to eight on a stand, used for lawn decorations. We would be pleased at any time to furnish sketches or drawings of many other designs.

SUPPLIES AND REQUISITES

Including many articles essential in Gardens and Greenhouses

E have arranged to supply our customers with the many essentials required in garden and greenhouse work, some of which are not readily accessible, or cannot well be procured of proper quality for the purpose intended. Orchid growers, especially, will find our peat, moss, cylinders, cribs, rafts, etc., the very best for the purpose, and of moderate price.

MATERIALS FOR ORCHID CULTURE

(Also for Nepenthes and Sarracenias)

RAFTS, CYLINDERS and CRIBS. Made of bard wood, put together with copper wire and brass nails.

Per doz.—4 inch, \$2; 5 inch, \$2.25; 6 inch, \$2.50; 7 inch, \$2.75; 8 inch, \$3; 9 inch, \$3.50; 10 inch, \$3.75; 11 inch, \$4.20; 12 inch, \$4.50.

Per doz.—7 inch, \$1.50; 8 inch, \$2; 9 inch, \$2.25; 10 inch, \$2.40; 11 inch, \$2.60; 12 inch, \$2.80; 14 inch, \$3; 16 inch, \$3.25.

Cylinders.

Each. -8x12 inch, \$1; 10x14 inch, \$1.25; 12x18 Inch. \$1.50; 14x25 inch. \$2.

ORCHID POTS. All sizes supplied at manufacturers' prices; send list of your wants.

Special prices for large quantities.

PEAT, FIBROUS, of best quality. The proper article in which to grow most orchids is our fibrous peat, which is really the fine wirelike roots of hard wooded which is really the fine wirelike roots of hard wooded vegetation, combined with a proportion of decomposed leaves and roots. The fibrous parts is separated from the finer decomposed material by drying and shaking the large clumps or cakes as received, and is really the very best thing in which to grow orchids, affording proper

support and perfect drainage. In practice, it is used with about one-fourth dry sphagnum moss, chopped up with it and thoroughly mixed. The finer portion of the peat, as shaken out, is a very good material, when mixed with good loam, in which to grow palms, ferns and all stove plants. We claim that our fibrous peat for orchid culture is of superior quality; nowhere else have we found peat to equal it. Our peat is taken from upland beds, and does not rot or decay quickly, as is generally the case with peat which is taken from wet, marshy places: it will not sour. Anyone familiar with the appearance of the healthy stock throughout all the orchid houses at Rose Hill well knows that the quality of peat and the best quality of live sphagnum moss contribute considerably to the general good result. Fibrous peat, per bag, \$2; per barrel, \$2.50; prices for larger quantities on application.

LIVE SPHAGNUM MOSS. First quality, short variety, upland grown, \$3 per barrel; second quality, long variety, swamp grown, \$2.50 per barrel.

Dead or Dry Moss. Excellent for mixing with peat for potting material, and also good for packing, \$2 per barrel. Prices for larger quantities on applica-

POTTING MATERIAL

Suitable for Palms, Stove Plants, Ferns and New Holland Plants; also for Rhododendrons and Azaleas for Pot or Outdoor Culture

COCOANUT FIBER. The real article, in the fine hairlike state; the best thing for perfect drainage in flower pots or tubs. Per barrel, \$3; smaller quantities in proportion.

FINE PEAT, not fibrous. Per bag, \$1.50; per bbl., \$2. LEAF MOLD. Per bag, \$1; per barrel, \$1.50. PEAT and LEAF MOLD MIXED. Per bag, \$1.50; per barrel, \$2.

INSECTICIDES

Preparations which will keep your plants from being infested with insects; use them in time, and avoid injury; prevention is far better than cure.

TOBACCO JUICE. Chemically prepared with other ingredients. Will keep roses, chrysanthemums, carnations, bouvardias, orchids, palms, foliage and many other plants free from the green and black aphis, the rose bug, red spider, and green worm, known as the "spanner"; also mealy bug, scale, etc. Should be applied with a syringe three or four times in succession where the least sign is shown of their appearance; is diluted with water. Quart bottles, 50 cents; per gallon, \$1.50, in one to five-gallon cans. Full directions given with each bottle or can.

TOBACCO DUST. This is a splendid insecticide for general use, and the best article for dusting vegetable plants, such as melons, cucumbers, etc., as it quickly destroys the flea and the striped beetles which feed upon the leaves; it should be sprinkled upon them while moist. Spread upon the ground it

keeps off earth insects, and acts as a fertilizer. Per lb., 8 cents; 10-lb. pkg., 60 cents; 100 lbs., \$5.

TOBACCO SOAP (Rose Brand). Makes an excellent wash for plants and trees infested with green fly, lice and eggs of insects. Dissolve two ounces in a gallon of water. ½ lb. tins, 25 cents. In 10, 25 or 50-pound cans, \$4, \$10 and \$18. SIEBRECHT'S TOBACCO POWDER, Chemically Prepared. This is the only article used with effect for destroying thrips which infest orchards. In canisters, 50 cents each.

TOBACCO STEMS FOR FUMIGATING. Clean and free from rubbish. In bales of 100 lbs., \$1.50 each; about 500 pound bales, \$6.

FIR-TREE OIL. This insect destroyer has proved to be most effective for red spider, green fly, mealy bug, caterpillars, slugs, blight, etc. Dilute with water and apply with ordinary or bellows syringe, or by dipping the plants in it. Price, with full directions. ½ pint bottle, 50 cents; pints, 75 cents; qt., \$1.50; ½ gal., \$2.75; gal., \$5.

LITTLE ANTIPEST. One of the safest and most powerful insect destroyers; it kills the pests every time. In liquid form, diluted with water, \$2.80 per gal.

WHALE OIL SOAP. Makes an excellent wash for trees and plants; kills insects and eggs on the bark. Per lb., 12 cents; 5 lbs., 50 cents; 25 lbs. and over, 8 cents per lb.

INSECTICIDES—Continued

HELLEBORE. Powdered White Hellebore for rose slugs, currant worms, etc. Dust on with gun or bellows while the foliage is moist. A small quantity of flour is sometimes mixed with the powder when it is applied, to give adhesiveness. Price 30 cents

sulphur, Flowers of Sulphur. This is a staple article for greenhouse use; mixed with linseed oil and painted on the pipes it has been found a sure cure for mildew. It should be mixed to the consistency of a thick paste and applied with a brush. In packages of 5 and 10 lbs., 30 and 50 cents each.

SLUG-SHOT. Destroys all insects injurious to bous and garden plants shrubs trees vipes notes.

house and garden plants, shrubs, trees, vines, potatoes, melons, cabbage, currants and vegetables and fruits of all kinds. Equals Paris green, where used liberally, without the danger from poison. Prices, 5 lb. pkt., 30 cents; 10 lbs. 50 cents; per bbl. of 235 lbs., 4 cents per lb.

HAMMOND'S GRAPE DUST. A preparation to kill the destructive mildew that strikes the grape vine, affecting fruit and stems in unfavorable sons. Also for like use upon any other plants or trees affected with mold, mildew or rust mites, and for any use where a fumigator or antiseptic is required, either in greenhouses or the open air. It is superior to the majority of liquid remedies used for this purpose, and can be more easily handled and applied. 5 lb. pkt., 35 cents; kegs of 100 lbs., \$5.

THOMPSON'S "SURE KILL"

is used exclusively at the Rose Hill Nurseries, which are noted for their large collection of ornamental trees, shrubs, evergreens, also the largest collection of palms, orchids, ferns and trees.

SIEBRECHT & SON. Sole Agents

SAN JOSE SCALE

This is the worst and most destructive of all scales. This is the worst and most destructive of all scales. It breeds more rapidly than any other. If there is one tree in a garden infested with this scale, before the scason is over the whole garden or orchard is infested. In many instances people who do not know this scale, think that it is part of the tree, as its color resembles that of the bark. The trees may seem to be all right, and no scale may be visible, but on close examination, the scale is found to be there.

If you have ever noticed while riding or driving through the country, trees in gardens and orchards that

through the country, trees in gardens and orchards that look as if they had been burned or struck with lightning, it is nothing more than the work of the San Jose Scale. They spread around the entire branches and smother them so that no air may reach the bark, and, by so doing, they prevent the circulation of sap and the branches are smothered, inch by inch, until life is extinct

The best time to use Thompson's "SURE KILL" is in March, April and May and also in October and November, during the breeding season.

Spreading of San Jose Scale is caused by all

movable insects and birds; even the winds blow it from one tree to another. This scale has done more damage than any insect ever known, and every lover of nature should help destroy it. Whenever a tree is infested with it, and the tree is too far gone or too old, you should advise your neighbor to destroy it, and, if this is not done, the State Agricultural Department should be notified and they will immediately have the tree or shrubs so infested, burned.

We have tried many remedies for killing San Jose Scale, and must say that "SURE KILL" does the work. We have used it in our Nursery, which is inspected two or three times a year, and the same has been pronounced by the New York State Agricultural Department, a clean Bill of Health.

"SURE KILL" is simple to apply.

SURE KILL

Sure Kill is a sure remedy.

Sure Kill has been well tried by us.

Sure Kill is easily prepared for use.

Sure Kill will remain long enough on the applied places to smother the scale, so that it cannot get air.

Sure Kill will not wash off with the first rain.

Sure Kill is shipped in cans and barrels.

Sure Kill once tried always used.

Sure Kill is economical.

Sure Kill is especially prepared for San Jose Scale.

Sure Kill should be used from March to May 1st,
and October to November.

Sure Kill: Price \$1.25 per gallon; in barrel lots, 75

cents per gallon.

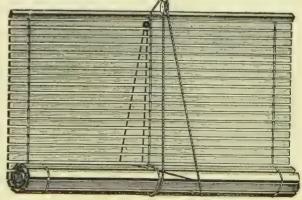

DIRECTIONS.

To one gallon of "SURE KILL" add 25 gallons of water. Mix well. It is then ready for use.

Son's Patent Siebrecht 8-Greenhouse Shading

Never gets out of order. Lasts as long as a The most satisfactory Shading ever used. good Greenhouse.

How IT IS MADE AND OPERATED .- The shading is made of slats, which are of the best clear wood. It is arranged in sections, either 61% or 8 feet wide, but can be made any width and length to suit size of roof. These slats are fast-ened together very substantially with galvanized wire bands and rings. The chain like fastenings are from 16 to 18 inches apart, each section of Shading having a roller attached to the lower end, the upper portion being fastened to the ridge of the house or highest point to be shaded. By means of a pulley and line it is easily rolled up and down at whatever distance may be desired. It can be operated inside or outside of the house. It will protect your glass from hail storms, and your plants from the intense heat in Summer, and from severe cold in Winter. Does not get out of order; does not destroy paint, putty or glass, as is the case with the old fashioned method of whitewash or paint. It gives your house an even and cooling shade and a neat appearance. It can be rolled up and down at will. which is a great advantage, especially when the short dark days come and only a little shading is needed. Estimates given on application.

Lawn at Rose Hill Nurseries

LAWN GRASS SEED AND FERTILIZERS

SIEBRECHT'S LAWN GRASS SEED. One of the best lawn mixtures, which we make ourselves, using our own formula. We have always had the best results from it and it gives entire satisfaction. Pk. \$1.25, bus, of 20 lbs. \$4,50.

SIEBRECHT'S GREEN VELVET LAWN GRASS SEED. This is one of the greatest and most satisfactory lawn seed mixtures ever used. It produces the quickest lawn and grows so evenly and thickly that it gives the effect of green velvet cloth. The proportion of the several varieties is so exact, and they are so evenly mixed, that it never fails to give entire satisfaction. Bus. of 20 lbs. \$5.

SIEBRECHT'S SHADY NOOK GRASS SEED. This gives the best results in shady places. Bus, of 20 lbs. \$5.50.

Siebrecht's Specially Prepared Grass Seed for Terraces, Tennis Courts, and Golf Links. Bus. \$5,50.

Note.—Our bushel is based upon a full weight of 20 ibs., and that weight is guaranteed in every bushel of seed. On larger quantities we shall be pleased to submit estimates.

Siebrecht's Rose Hill Brand Lawn Enricher and Plant Food. The best Lawn and Garden Dressing. This is a fertilizer specially made for the Rose Hill Nurseries, and has stood the test of time and use. It has always been found to be a perfect lawn enricher, producing the best and greatest amount of nourishment. It can also be used in the vegetable garden or in the greenhouse. We have two qualities, put up in bags or barrels, at the following prices: Siebrecht's X, ton, \$27.50; Siebrecht's XX, ton, \$32.50.

FERTILIZERS

We offer here some pure natural fertilizers. There is nothing like the genuine article for plants. Can be used with great satisfaction on most all plants in this catalogue, either in liquid form or mixed with the soil.

EXCELSIOR FERTILIZER. Specially prepared plant food, put up in small quantities for conservatory and house plants; a very good article for its purpose. 20 cents per package.

PURE GROUND BONE MEAL. Coarse or Fine, for mixing with soil for potting or planting out roses, either in the greenhouse or outdoors; also essential for grape borders, in proportions of one to fifty. This is one of the best and most permanent fertilizers.

Coarse Ground Bone, in about 200 pound barrels, \$2.75 per 100 pounds, \$42 per ton.

Fine Ground Bone, in barrels of about 200 pounds, \$2.75 per 100 pounds, \$42 per ton.

PURE SHEEP MANURE. The best natural manure in the market is compressed sheep manure. It comes in cakes. These are soaked in water, and the liquid is the best and purest medium for fertilizing pot plants of any kind. House and window plants are greatly benefited by the occasional application of this most excellent and economical fertilizer. Per bag of 100 lbs., \$2.50; per ton, \$30.

LAWN FERTILIZER. Siebrecht & Son's Special Brand. Odorless; a little can be used all through the season; tested by leading agricultural chemists; will produce richer lawns than any other used. Per 100 pounds, \$2, about 220 pounds to the barrel; \$37.50 per ton.

Our City Office—Siebrecht Building

Is located in the centre of the Metropolis, corner of 38th Street and Fifth Avenue, only a short distance from the Grand Central and the Pennsylvania R. R. Depots.

Here orders are received for Wedding Decorations and other social functions and from hence flowers are shipped to all parts of the country.

Flowers sent by our special arrangements to all parts of the civilized world.

Church Wedding Decoration

A special feature of our Decorative Department is the artistic embellishment of parlors and churches for weddings or other social events of like character. With unequaled resources and long experience, we can assure satis ry results.

OUT-OF-TOWN DEPARTMENT.

are artists in this line and who are constantly getting up w designs and arrangements for decorations. Careful attention is always given to orders for out-of-town work, and satisfactory results can be assured.

We make a specialty of decorations out of the city. We have specially trained and experienced men, who
